

Five Year Degree Course in Architecture B.Arch.

First Year B.Arch - Term - I

Applicable from term 2007-2008

Sl. No.	Subjects	Teaching Scheme			Scheme of Examination			
		Lectures	Tutorials	Studio	Total	Paper	Sessional	
1)	Design Fundamentals in Architecture	3	1	—	4	50	50	100
2)	Structure - I	3	1	—	4	100	50	150
3)	English	2	0	—	3	—	50	50
	Communication Skills							
4)	History of Architecture and Human Settlements - I	3	1	—	4	100	50	150
5)	Building Materials - I	3	1	—	4	100	50	150
6)	Architectural Drawing - I	2	—	8	8	100	50	200
7)	Visual Arts - I	—	—	4	4	—	100	100
8)	Basic Design	—	—	6	6	—	100	100
9)	Model Workshop - I	—	—	5	5	—	50	50
	Total	14	5	21	40	450	200	1050

Details Syllabus - First Year B.Arch.

TERM - I

1.1 Design Fundamentals in Architecture

Paper - 2 Hrs

Marks - 50

Sessional - 50

Lecture Hrs. - 4/Week

- 1.1 Understanding and concepts of shelter as architecture, factors influencing architecture such as region, climate, socio-cultural, economical and technological factors.
- 1.2 Various disciplines needed to be learnt by an architect.
- 1.3 Role and responsibilities of an architect in society and in field as leader of the planning team, architecture as profession.
- 1.4 Styles in architecture as an outcome of philosophy, religion and contribution of architect as a philosopher.
- 1.5 Understanding of classical, contemporary and modern architecture.
- 1.6 Brief outline of contribution of architects in Indian Context.

2.0 Structure - I

Paper - 3 Hrs

Marks - 100

Sessional - 50

Lecture Hrs. - 4/Week

- 2.1 Statics - Basic principles of statics, forces, units, types of force system, conditions of force equilibrium of force system. Resultant of concurrent and parallel forces, analytical and graphical method. Parallel force and couples.
- 2.2 Centroid of simple and complex geometrical areas.
- 2.3 Reactions in the beam.
- 2.4 Basic ideas about structure in the design of architecture, various structural system concepts for buildings.

3.0 English / Communication Skill

Lecture Hrs - 3/Week

Sessional - 50

- 3.1 Essentials of business correspondence, business letters, applications to various agencies.
- 3.2 Essential structure of report writing.
- 3.3 Art of verbal communication, art of public speaking, art of group discussion.
- 3.4 Art of expression, knowledge of body language.

4.0 History of Architecture and Human Settlements

Paper - 3 Hrs

Sessional - 50 Marks

Marks - 100

Lecture Hrs - 4/Week

- 4.1 The emphasis of this subject should be on solution and development of constructional and architectural problems relating to available building material, techniques of construction and resultant architectural space and form. Cross reference of time and places.
- 4.2 Egyptians, West Asiatic, Greek, Roman and Byzantine architecture.

5.0 Building Materials - I

Paper - 3 Hrs.

Marks - 100

Sessional - 50

Lecture Hrs - 4/Week

- 5.1 Introduction to building materials as mean and element of building construction, aesthetics of exteriors and interiors and a major tool for the designer.
- 5.2 Natural clay and clay products-bricks, terracotta, roofing materials.
- 5.3 Types and origin of building stone, quarrying, dressing, properties, preservatives and applications.
- 5.4 Timber and timber derivatives, natural timber, seasoning process, defects, preservation, veneers and plywood, properties and applications.
- 5.5 Lime cements - their ingredients, types of lime and cement, properties, applications in building industry
- 5.6 Sand and aggregates, type and properties, use, concrete mix for different purpose
- 5.7 Glues and adhesives

5.0 Architectural Drawing and Graphics - I

Paper - 3 Hrs.

Marks - 100

Sessional - 100

Studio Hrs - 8/Week

Course content unchanged as per existing syllabus

7.0 Visual Arts - I

Paper - Nil

Marks -

Sessional - 100

Studio Hrs - 4/ week

- 7.1 Understanding of Arts, fine arts, performing arts and visual arts. Sculpture and architecture. Architecture as a piece of visual arts
- 7.2 Study of fundamentals of visual arts - point, line, planes, solids, voids, mass and volume with its simple visual relationships
- 7.3 Introduction to color theory and its visual appreciation, psychological impacts on visual perceptions
- 7.4 Textures as means of visual and physical perceptions
- 7.5 Use of values of lines for various expressions as a tool for drawing. Multiple methods of presentation and introduction to rendering skills

8.0 Basic Design

Marks -

Studio Hrs - 4/Week

Sessional - 100

- 8.1 Understanding difference of facilities of arts, science, commerce, engineering and architecture and personality as an architect.
- 8.2 Design tools, scales and understand requirements of the theory of designing
- 8.3 Elements of design - point, line, plane, solids, voids.
- 8.4 Principles of composition - balance, rhythm, contrast, harmonic, symmetry, continuity, proportions, repetition, distortion
- 8.5 Space, environment, enclosures as solids and voids.
- 8.6 Progression of two dimensional shapes into three dimensions and creation of solid and void balance in compositions
- 8.7 Concepts of designing of functional space and aesthetical relations
- 8.8 Theory and philosophy of aesthetics and perceptions

9.0 Model Workshop - I

Paper - Nil

Studio Hrs. - 3/Week

Sessional - 50

- 9.1 Instructions in use of specific materials and tools for making models, model making techniques.
- 9.2 Model making in paper, paper board, plastic, plaster of paris and clay.

Model buildings.

<u>10) Structure - II</u>	
1) Details of Villas - Part Year B, Arch.	Term - II
Paper - 3 Tirs	Lecture Tirs - 4/Week
Sessional - 50	Marks - 100
1) Plasticity of materials, stresses and strains, Hook's law, stress / strain diagram, Possession's ratio, relation between elastic constants, temperature stresses, greatest constants, working stress and factor of safety, lateral strain and plastic modulus, section modulus and moment of resistance, (Simple)	1) Distribution of shear stress in various cross sections, Neutral axis - section modulus and moment of resistance
Paper - 2 Tirs	1) Principles planes and principal stresses
Sessional - 50	1) Neutral axis - eccentric loading and moment of resistance
1) Paper - 2 Tirs	1) Details of shear stresses in various sections
Sessional - 50	1) Plasticity of materials, stresses and strains, Hook's law, stress / strain diagram, Possession's ratio, relation between elastic constants, temperature stresses
Paper - 3 Tirs	1) Plasticity of materials, stresses and strains, Hook's law, stress / strain diagram, Possession's ratio, relation between elastic constants, temperature stresses
Sessional - 50	1) Neutral axis - eccentric loading and moment of resistance
Paper - 3 Tirs	1) Principles planes and principal stresses
Sessional - 50	1) Neutral axis - section modulus and moment of resistance
Paper - 2 Tirs	1) Distribution of shear stress in various cross sections
Sessional - 50	1) Plasticity of materials, stresses and strains, Hook's law, stress / strain diagram, Possession's ratio, relation between elastic constants, temperature stresses
Paper - 3 Tirs	1) Plasticity of materials, stresses and strains, Hook's law, stress / strain diagram, Possession's ratio, relation between elastic constants, temperature stresses
<u>20) History of Architecture and Human Settlement - II</u>	
Paper - 2 Tirs	Lecture Tirs - 4/Week
Sessional - 50	Marks - 50
1) Classification of the preparation styles - Romanesque, Gothic, Renaissance and Baroque periods, its impact on some of the contemporary masters, (Simple)	1) Rise of Hinduism - development of temple architecture, Individual, Family and Community temples, tribal bands and their works, mainly, decorative bands in Sessional - 50
Paper - 3 Tirs	1) Rise of Hinduism and individualized styles
Sessional - 50	1) Individual, Family and Community temples, tribal bands and their works, mainly, decorative bands in Sessional - 50
Paper - 3 Tirs	1) Individual, Family and Community temples, tribal bands and their works, mainly, decorative bands in Sessional - 50
Sessional - 50	1) Individual, Family and Community temples, tribal bands and their works, mainly, decorative bands in Sessional - 50
<u>30) Building Materials - II</u>	
Paper - 3 Tirs	Lecture Tirs - 3/Week
Sessional - 50	Marks - 100
1) Laminated bands, fibre bands and their works, mainly, decorative bands in Sessional - 50	1) Laminated bands, fibre bands and their works, mainly, decorative bands in Sessional - 50
Paper - 3 Tirs	1) Individual, Family and Community temples, tribal bands and their works, mainly, decorative bands in Sessional - 50
Sessional - 50	1) Individual, Family and Community temples, tribal bands and their works, mainly, decorative bands in Sessional - 50
Paper - 3 Tirs	1) Individual, Family and Community temples, tribal bands and their works, mainly, decorative bands in Sessional - 50
Sessional - 50	1) Individual, Family and Community temples, tribal bands and their works, mainly, decorative bands in Sessional - 50
<u>10) Social Science and History of Culture</u>	
Paper - 2 Tirs	Lecture Tirs - 4/Week
Sessional - 50	Marks - 50
1) Concept of time in society as settlement, society, groups and sub-groups, formation of groups and young dynamics	1) Formation of culture, subculture, settlement, society and its impact on architecture
Paper - 2 Tirs	1) Concept of time in society as settlement, society, groups and sub-groups, formation of groups and young dynamics
Sessional - 50	1) Formation of culture, subculture, settlement, society and its impact on architecture
Paper - 2 Tirs	1) Formation of culture, subculture, settlement, society and its impact on architecture
Sessional - 50	1) Formation of culture, subculture, settlement, society and its impact on architecture
<u>40) Social Science and History of Culture</u>	
Paper - 2 Tirs	Lecture Tirs - 4/Week
Sessional - 50	Marks - 50
1) Non ferrous metals and alloys - Aluminim, copper, brass, lead - its properties, uses and preservation	1) Non ferrous metals and alloys - Aluminim, copper, brass, lead - its properties, uses and preservation
Paper - 2 Tirs	1) Non ferrous metals and alloys - Aluminim, copper, brass, lead - its properties, uses and preservation
Sessional - 50	1) Non ferrous metals and alloys - Aluminim, copper, brass, lead - its properties, uses and preservation
Paper - 2 Tirs	1) Non ferrous metals and alloys - Aluminim, copper, brass, lead - its properties, uses and preservation
Sessional - 50	1) Non ferrous metals and alloys - Aluminim, copper, brass, lead - its properties, uses and preservation
<u>50) Plants, Surface Preparation, Methods of Application, Properties, and Functions</u>	
Paper - 2 Tirs	Lecture Tirs - 4/Week
Sessional - 50	Marks - 50
1) Plants by nature, their, preparation methods, properties, and functions	1) Plants by nature, their, preparation methods, properties, and functions
Paper - 2 Tirs	1) Plants by nature, their, preparation methods, properties, and functions
Sessional - 50	1) Plants by nature, their, preparation methods, properties, and functions
Paper - 2 Tirs	1) Plants by nature, their, preparation methods, properties, and functions
Sessional - 50	1) Plants by nature, their, preparation methods, properties, and functions
<u>60) Wood and Splicable Woods in Industry</u>	
Paper - 2 Tirs	Lecture Tirs - 4/Week
Sessional - 50	Marks - 50
1) Wood and splicable woods in industry	1) Wood and splicable woods in industry
Paper - 2 Tirs	1) Wood and splicable woods in industry
Sessional - 50	1) Wood and splicable woods in industry
Paper - 2 Tirs	1) Wood and splicable woods in industry
Sessional - 50	1) Wood and splicable woods in industry

5.0 Introduction to Computing

Paper - Nil

Marks -

Sessional - 50

Lecture Hrs. - 4/Week

- 5.1 Introduction to system, peripherals, hardware, software, RAM, ROM input and output devices

- 5.2 M. S. Word

- 5.3 Auto CAD - 2D, 3D

- 5.4 Introduction to internet applications

- 5.5 M. S. Excel

6.0 Architectural Drawing and Graphics – II

Paper - 3 Hrs

Marks - 50

Sessional - 100

Studio Hrs. - 8/Week

Same as existing syllabus

7.0 Visual Arts – II

Paper - Nil

Sessional - 100

Studio Hrs. - 6/Week

- 7.1 Simple compositional approaches in two dimensional and three dimensional designs, three dimensional curvilinear forms, massing.
- 7.2 Compositional approaches in designs using colours and textures.
- 7.3 Seminar presentation on aesthetical values of above compositional exercises.

8.0 Basic and Architectural Design

Paper - Nil

Sessional - 150

Studio Hrs. - 6/Week

- 8.1 Comprehensive understanding of skills of organization of elements design, their correlation, linkages, circulation and movements, proportion, scale, discipline and order.
- 8.2 Understanding the sense of space, arrival, destination, holding, privacy, proximity, fear, exhilaration, inviting, occult and their distinctions.
- 8.3 Basic design principals related to built forms, positive – negative spaces, mass, visual mass and its perceptual linkage. Volumetric analysis.
- 8.4 Design of two dimensional surfaces and three dimensional outcome.

9.0 Model Workshop – II

Paper - Nil

Sessional - 50

Studio Hrs. - 3/Week

- 9.1 Simple carpentry skills and joints.
- 9.2 Skill of modeling in plastic and acrylic, ply and timber
- 9.3 Developing skills for creation of different textures
- 9.4 Models of architectural elements and characters

Reference Books

6. Visual Arts – II Basic and Architectural Design	Principals of building design maier Manfred. Fundamentals in Architecture V. S. Pramod Form Space order, Time space order.
7. Model Workshop	New origami arts Model building

Electives – Subjects

Elective – I

- 1) Modular coordination and modular theory of planning
- 2) Geometry of forms
- 3) Behaviour of architectural spaces
- 4) Ergonomics in architectural design
- 5) Ergonomics of furniture
- 6) Furniture for physically handicapped
- 7) Geometry – form and aesthetics

Elective – II

- 8) Industrial Structures
- 9) Long Span Structures
- 10) Maintenance of Structures
- 11) Hospital Architecture
- 12) Product Design
- 13) Psychological spaces in architecture
- 14) Energy conscious architecture

Elective – III

- 15) G.S.I. applications in architecture
- 16) Cost effective architecture
- 17) Application of non conventional energy in architecture
- 18) Barrier free architecture
- 19) Fiert architecture
- 20) Architectural conservation
- 21) Non conventional building materials and techniques of construction
- 22) Traffic and transportation

Revision in the Regulations :

1. **H Scheme of Examinations - 3 (d)**
The term - I and term - II Examination of Fourth Year B.Arch. together will be called The Fourth Year Examination in Architecture.
2. **3 (e)**
The term - I and term - II Examination of Final Year Architecture together will be called Final Year Examination for the degree of Bachelor of Architecture.
The term - I Examination of Final Year Architecture shall be vivavoice to test the candidate in the practical experience a student has gained during the period of training in the term - I.

Sessional Assessment :

1. The sessional work in the following subjects only, shall be assessed by the external examiners alongwith internal examiner.
 - i. Basic design.
 - ii. Basic and Architectural Design.
 - iii. Architectural Design
 - iv. Building Construction.
 - v. Dissertation / Project Work
2. For the assessment of sessional work in above subjects, the internal assessment by internal examiner will be 50% of total marks and the remaining 50% by the external examiner.
3. This examination will be jointly conducted by the internal and external examiners, for the allotment of sessional assessment marks.
4. For the rest of the subjects, where sessional assessment is to be made, will be made by the internal examiner only.
5. Computer work / computer help in design at final year Term-II dissertation is permitted
