**NORTH MAHARASHTRA UNIVERSITY,
JALGAON.**

Syllabus for M.Sc.(Part-I)

MICROBIOLOGY.

(W.e.f. Acd.Yr. 2002 - 2003)

॥ उत्तरी महाराष्ट्र विश्वविद्यालय ॥

NORTH MAHARASHTRA UNIVERSITY, JALGAON.

Syllabus for M.Sc.(Part-I) MICROBIOLOGY.

(W.e.f. Acad.Yr. 2002 - 2003)

STRUCTURE

Semester – I

MB-101	Mycology, Phycology and Virology
MB-102	Microbial Genetics
MB-103	Bioenergetics and Intermediary Metabolism
MB-104	Laboratory Course - I
MB-105	Laboratory Course - II

Semester – II

MB-201	Advanced Enzytology
MB-202	Biotechniques
MB-203	Biostatistics and Extremophile Microbiology
MB-204	Laboratory Course - I
MB-205	Laboratory Course - II

Cont. - 2

॥ अंतर्राष्ट्रीय शास्त्रसंक्षेप ॥

NORTH MAHARASHTRA UNIVERSITY, JALGAON.

Syllabus for M.Sc.(Part-I) MICROBIOLOGY.
(W.e.f. A.c.d.Yr. 2002 - 2003)

MB-101 : Mycology, Phycology and Virology

- An Introduction to Fungi : General features of fungi, Classification of fungi, Life cycle of selected fungi (*Aspergillus, Penicillium, Fungi*)
- Structure of Fungal Cells and Growth : Hyphae and non-motile unicells, motile cells, spores, dormancy, growth of population and colonies, effect of environment on growth, prevention of fungal growth.
- Phycology : Distribution of algae, classification of algae, algal nutrition, algal thallus, algal reproduction, green algae, diatoms, euglenoids, brown Rhodophyta, Pyrophyta, Algal ecology and algal Biotechnology.
- General Virology : Brief outline on discovery of viruses, nomenclature and classification of viruses, distinctive properties of viruses, morphology and ultra-structure, capsids and their arrangements, types of envelope and their composition, viral genome, their types and structures, virus related agents (viroids and prions).
- General methods of viral diagnosis : Cultivation of viruses in embryonated eggs, experimental animals and cell cultures, primary and secondary cell cultures, suspension cell cultures and monolayer cell cultures, cells strains, cell lines and transgenic systems, infectivity assay (Plaque method, end point method)- infectivity assay of plant viruses.
- Bacterial Viruses : Bacteriophage structural organization, life cycle, one step growth curve, transcription, DNA replication, eclipse phase, phage production, burst size, lysogenic cycle, brief details on T4, lambda and P1.

Plant viruses : Classification and nomenclature; effects of viruses on plants; appearance of plants; histology, physiology and cytology of plants; common viral diseases of plants : paddy, cotton, tomato and sugarcane; life cycle; type species of plant viruses like TMV, Cauliflower Mosaic Virus and Potato Virus X; indicator plants.

Animal viruses : Classification and nomenclature of animal/human viruses, epidemiology, life cycle, pathogenicity of RNA viruses : Picorna, togaviridae, Rhabdo and HIV, DNA viruses – SV 40, Hepatitis, interferons and anti-viral drugs.

North Maharashtra University, Jalgaon 425 001

Syllabus For M.Sc. In Microbiology

MB-102 : Microbial Genetics

- Gene as unit of mutation and recombination : Molecular nature of mutations, mutagens. Spontaneous mutations-origin.
- Gene transfer mechanisms-transformation, transduction, conjugation and transfection. Mechanisms and applications. Genetic analysis of microbes. Bacteria and yeast.
- Plasmids, Properties, Nomenclature and Classification F-factors description and their uses in genetic analysis. Colicins and col factors. Plasmids as vectors for gene cloning. Replication of selected plasmids. compatibility. Transposons and their uses in genetic analysis.
- Bacteriophages, Lytic phages - T7 and T4. Lysogenic phage P1, M13 and fX174. Life cycle, and their uses in microbial genetics.
- Microbial genetics and design of vaccines. BCG and design of vaccine for TB and leprosy. DNA vaccines, design and advantages.

2. J.W. Dale (1994). *Molecular genetics of bacteria*. John Wiley & Sons.
3. Sutcliffe & Yablon (1991) *Modern microbial genetics*. Niley, Ltd.

North Maharashtra University, Jalgaon 425 001

Syllabus For M.Sc. In Microbiology

MB-103 : Bioenergetics and Intermediary Metabolism

- Bioenergetics : Energy transformation. Laws of thermodynamics, entropy, enthalpy, Gibbs energy, free energy changes and redox potentials. Phosphate potential, Uniport, antiport and symport mechanisms, shuttle systems.

The mitochondrial respiratory chain order and organization of carriers, proton gradient, iron sulphur proteins, cytochromes and their characterization. The Q cycle and the stoichiometry of proton extrusion and uptake; P/C and H/P ratios. Reversed electron transfer, respiratory controls and oxidative phosphorylation uncouplers and inhibitors of energy transfer. Fractionation and reconstitution of respiratory chain complexes.

ATP – Synthetase complex, Microsomal electron transport, partial reduction of oxygen, superoxides.

Cont. 4

—4—

Intermediary metabolism : Approaches for studying metabolism.

- * **Carbohydrates :** Glycolysis, citric acid cycle its function in energy generation and biosynthesis of energy rich bonds, pentose phosphate pathway and its regulation. Alternate pathways of carbohydrate metabolism.
Gluconeogenesis, interconversions of sugars. Biosynthesis of glycogen, starch and oligosaccharides. Regulation of blood glucose homeostasis. Hormonal regulation of carbohydrate metabolism.
- * **Lipids :** Fatty acid biosynthesis : Acetyl Co-A carboxylase, Fatty acid synthase, desaturase and elongase. Fatty acid oxidation : α , β , ω oxidation and lipoxidation. Lipid Biosynthesis : Biosynthesis of triacylglycerols, phosphoglycerides, Ketone bodies : Formation and utilization, Metabolism of Circulating lipids : chylomicrons LDL, HDL and VLDL. Free fatty acids. Lipid levels in pathological conditions.
- * **Amino Acids :** Biosynthesis and degradation of amino acids and their regulation. Specific aspects of amino acid metabolism. Urea cycle and its regulation. In-born errors of amino acid metabolism.
- * **Nucleic Acids :** Biosynthesis of purines and pyrimidines. Regulation of purine and pyrimidine biosynthesis. Degradation of purines and pyrimidines. Structure and regulation of ribonuclease reductase. Biosynthesis of ribonucleotides, deoxyribonucleotides and polynucleotides. Inhibitors of nucleic acid biosynthesis

* * * * *

North Maharashtra University, Jalgaon 425 001

Syllabus For M.Sc. In Microbiology

MB-104 : Laboratory Course-I

- Introduction to safe laboratory practices, first aid, hazardous/inflammable chemicals, antidotes to toxic chemicals; care and handling of glassware, instruments, planning, execution and recording of data.
- Concept of buffers, pH, pK, molarity, normality
- Amino acids separation and identification by paper chromatography
- Estimation of amino acids by ninhydrin method
- Estimation of protein by Lowry/Biuret method
- Acid, alkaline and enzymatic hydrolysis of protein and their evaluation by gel filtration
- Carbohydrate separation and identification by thin layer chromatography
- Estimation of reducing sugars by DNSA method
- Total carbohydrates estimation by phenol sulphuric acid method

Cont..5

- Vitamin C estimation
- Colorimetric estimation of cholesterol
- Estimation of inorganic phosphate
- Preparation of egg albumin, milk casein, cystine and starch

Books and References

1. D. Plummer : An Introduction to Practical Biochemistry, Tata McGraw Hill Publisher.
2. J. Jayaraman : Laboratory manual in Biochemistry, New Age International Publisher.
3. S. Sadashivam & A. Manikam : Methods in Agriculture Biochemistry, Wiley Eastern Ltd., New Delhi.

North Maharashtra University, Jalgaon 425 001

Syllabus For M.Sc. in Microbiology

MB-105 : Laboratory Course-II

- Single colony isolation and checking genetic markers (genotype and phenotype)
- One step growth curve of bacteriophage T4
- Spontaneous and induced mutation : Isolation of antibiotic resistant mutants, auxotrophic mutants and Reversion of auxotrophs.
- Selective enrichment of auxotrophic and antibiotic (*lef*) mutant
- Bacterial conjugation
- Bacterial transformation
- Growth curve of fungi/yeast
- Study of mutations by Ames test
- Algal cultivation
- Slide culture cultivation of yeast, fungi
- Vit E production by *Spirulina*
- Detection and estimation of aflatoxin
- Bacteriocin production
- Plasmid curing by Physical method (elevated growth temperature)

Cont.- 6

North Maharashtra University, Jalgaon 425 001

Syllabus For M.Sc. In Microbiology

MB -201 : Advanced Enzymology

- Review of unisubstrate enzyme kinetics and factors affecting the rates of enzyme catalyzed reactions. Michaelis pH functions and their significance.
- Classification of multisubstrate reactions with examples of each class. Kinetics of multisubstrate reactions. Derivation of the rate of expression for Ping Pong and ordered Bi Bi reaction mechanism. Use of initial velocity, inhibition and exchange studies to differentiate between multisubstrate reaction mechanisms.
- Methods of examining enzyme-substrate complexes.
- Methods for measuring kinetic and rate constants of enzymic reactions and their magnitudes.
- Enzymes Turnover and methods employed to measure Turnover of enzymes. Significance of enzymes Turnover.
- Allosteric enzymes. Sigmoidal kinetics and their physiological significance. Symmetric and sequential modes for action of allosteric enzymes and their significance.
- immobilized enzymes and their industrial application.
- Multienzyme system : Occurrence, isolation and their properties. Polymeric nature of multienzyme systems. Mechanism of action and regulation of pyruvate dehydrogenase and fatty acid synthetase complexes. Immobilized Multienzyme Systems and their applications.
- Co-enzymes and cofactors : Water soluble vitamins and their coenzymes. Metallo enzymes.
- Detailed Mechanisms of Catalysis of serine proteases Ribonuclease Chymotrypsin.
- Enzyme regulation, General mechanisms of enzyme regulation : Feed Back Inhibition and Feed forward stimulation; Enzyme repression, induction and degradation, control of enzymic activity by products and substrates; Reversible and irreversible covalent modifications of enzymes; Mono-cyclic and multi-cyclic cascade systems with specific examples.

Cont. . 7..

- - 4 -

North Maharashtra University, Jalgaon 425 001
Syllabus For M.Sc. in Microbiology
MB - 202 : Biotechniques

- Principles of buffer and pH metery (calculation of molarity)
- Chromatographs : adsorption, paper (PC), thin layer (TLC), ion exchange, high pressure (HPLC) and gas liquid (GLC) and affinity chromatography.
- Application of each chromatography technique in Biological Sciences
- Principles (Beer's law), methodology and applications of UV and visible spectroscopy (colorimetry and spectrophotometry).
- Colorimetry with respect to determination of reducing sugars, proteins and phosphate.
- Dialysis and electrodialysis, filtration and ultrafiltration, factors governing the choice of membranes.
- Electrophoresis, principles, types, parameters affecting electrophoretic separation, gradient electrophoresis and iso-electrofocussing, peptide mapping.
- Principles of microscopy, transmission electron microscopy (TEM), scanning electron microscopy (SEM).
- Principles and applications of lyophilization and Laminar air flow benches
- Principles and applications of centrifugation to biological systems. Basket centrifugation, density gradient centrifugation.
- Principles and applications of IR, NMR, atomic absorption spectroscopy, X-ray diffraction techniques.

Cont... 8

North Maharashtra University, Jalgaon 425 001
Syllabus For M.Sc. in Microbiology,
MB – 203 A : Biostatistics

- Principles and practices of statistical methods in biological research.
- Samples and population.
- Basic statistics - averages, statistics of dispersion, coefficient of variation.
- Standard error.
- Confidence limits.
- Probability distribution (Binomial, Poisson and Normal).
- Tests of statistical significance.
- Simple correlation or regression.
- Analysis of variance.
- Examples of the above for clarity of concepts.

MB – 203 B : Extremophiles Microbiology

- Mechanisms and molecular aspects of adaptation
 - a. Acidophiles
 - b. Alkalophiles
 - c. Thermophiles
 - d. Barophiles
 - e. Osmophiles
 - f. Psychrophiles
- Halophiles : Membrane variation, electron transport.
- Applications of thermophiles and extremophiles.

Books and References

6. Kushner, D.J. (1978) Microbial Life in Extreme Environments, Academic Press, London.

Contd. 9.

North Maharashtra University, Jalgaon 425 001
Syllabus For M.Sc. in Microbiology
MB - 204 : Laboratory Course-I

- Purification of a typical enzyme.
- Effect of pH, temperature, activators and inhibitors on enzyme activity.
- Determination of activation energy of a typical enzyme catalyzed reactions (Arrhenius plot).
- Determination of specific activity and turn over no. of salivary amylase.
- Determination of Km and Vmax of amylase by Michaelis plot, double reciprocal plot/Eddie Hofstee plot.
- Immobilization of a typical enzyme.
- Stabilization of an enzyme as a function of temperature and storage duration.
- Isolation and enrichment of
 - a) Alkalophiles
 - b) Acidophiles
 - c) Osmophiles

Books and References

1. An introduction to practical biochemistry - D. Plummer, Tata McGraw Hill Publishers.
2. A laboratory manual in biochemistry - J. Jayaraman - New Age International Publishers.
3. Sadashivan, S. and Manickam. Methods in Agricultural Biochemistry, Wiley Eastern Ltd., New Delhi.

North Maharashtra University, Jalgaon 425 001
Syllabus For M.Sc. In Microbiology
MB - 205 A : Laboratory Course-II

- Separation of amino acids by paper chromatography.
- Paper electrophoresis.
- Agarose gel electrophoresis.
- Polyacrylamide gel electrophoresis.
- Separation of blue dextran by gel filtration.
- Verification of Beers law and determination of λ_{max} . Absorption spectra.
- Demonstration - Lyophilizer/GC/HPLC/AAS.
- Carbohydrate separation by TLC.

Cont.-10

MB - 205 B : Computer Applications

- Computer peripherals & hardware description : Computer system design, Recognition and spectrum of different components of a computer system and their respective usage I/O and storage devices.
- Operating systems : System and application software, CUI & GUI, DOS, Latest available windows, multitasking.
- Introduction of digital computers : Organization, low level and high level languages, binary number system.
- Flow charts and programming techniques.
- Introduction to programming in Turbo Basic and C, writing few programmes in basic & C.
- Introduction to data structures and database concepts, introduction to Internet and its applications.
- Introduction to MS-Office software, covering words processing, spreadsheets and presentation software.
- Introduction to sequence analysis software.

Books and References
