JALGAON (M.S.)  
Final Year Engineering  
(Computer)  
Faculty of Engineering and Technology**

**Teacher and Examiner's Manual  
Semester – VII  
W.E.F. 2015 – 2016**

# Advanced UNIX Programming

Teacher, Paper setter and Examiner should follow the following guidelines.

## Unit - I

Teacher should facilitate learning of Basic Concepts of UNIX System.

| 1. |   | Lect<br>required  | Ref<br>No |
|----|---|---|-----------|
|    | a | <b>Unix System Overview-</b> Introduction, UNIX Architecture, Logging In, Files and Directories, Input and Output                             | 01<br>01  |
|    | b | Programs and Processes, Error Handling, User Identification, Signals  | 01<br>01  |
|    | c | Time Values, System Calls and Library Functions   | 02<br>01  |
|    | d | <b>File I/O-</b> Introduction, File Descriptors, open Function, creat Function, close Function, lseek Function, read Function, write Function | 01<br>01  |
|    | e | File Sharing, Atomic Operations- Appending to a file, Creating a file   | 02<br>01  |
|    | f | dup and dup2 Functions, sync, fsync, and fdatasync functions, fcntl function  | 01<br>01  |

### References:

| 1 | W. Richard Stevens and Stephen A. Rago, Advanced Programming in the UNIX Environment, 2/E, Pearson Education |
|---|--|

## Unit - II

Teacher should facilitate learning of Files and Directories along with system file.

| 2. |   | Lect<br>required  | Ref<br>No |
|----|---|---|-----------|
|    | a | <b>Files and Directories-</b> Introduction, stat, fstat, and lstat Functions, File Types, File Access Permissions, access Function, umask Function                                    | 01<br>01  |
|    | b | chmod and fchmod Functions, Sticky Bit, File Size, File Truncation, File Systems, link, unlink, remove and rename Functions   | 02<br>01  |
|    | c | Symbolic Links, symlink and readlink Functions, File Times, mkdir and rmdir Functions, chdir, fchdir, and getcwd Functions  | 01<br>01  |
|    | d | <b>System Data Files and Information</b> – Introduction, Password File-getpwuid, getpwnam, getpwent, setpwent, endpwent, Shadow Passwords- getsppnam, getsppent, setsppent, endsppent | 02<br>01  |
|    | e | Group File- getgrgid, getgrnam, getgrent, setgrent, endgrent, Login Accounting, System Identification- uname, gethostname   | 01<br>01  |
|    | f | Time and Date Routines- time, gettimeofday, gmtime, localtime, mktime, asctime, ctime, strftime   | 01<br>01  |

**References:**

|   |  |
|---|--|
| 1 | W. Richard Stevens and Stephen A. Rago, Advanced Programming in the UNIX Environment, 2/E, Pearson Education |
|---|--|

**Unit – III**

Teacher should facilitate learning of process environment and control.

| 3. |   | Lect<br>required | Ref<br>No |
|----|---|------------------|-----------|
| a  | <b>Process Environment-</b> Introduction, main Function, Process Termination- Exit Functions, atexit Function             | 02               | 01        |
| b  | Command-Line Arguments, Environment List, Memory Layout of a C Program, Memory Allocation- malloc , calloc, realloc, free | 01               | 01        |
| c  | Environment Variables   | 01               | 01        |
| d  | <b>Process Control</b> – Introduction, Process Identifiers- getpid, getppid, getuid, geteuid, getgid, getegid             | 01               | 01        |
| e  | fork Function- file sharing, vfork Function, wait and waitpid Functions   | 02               | 01        |
| f  | Race Conditions, exec Functions- execl, execv, execl, execve, execlp, execvp, Process Accounting                          | 01               | 01        |

**References:**

|   |  |
|---|--|
| 1 | W. Richard Stevens and Stephen A. Rago, Advanced Programming in the UNIX Environment, 2/E, Pearson Education |
|---|--|

**Unit – IV**

Teacher should facilitate learning of signals, threads and daemon process.

| 4. |  | Lect<br>required | Ref<br>No |
|----|--|------------------|-----------|
| a  | <b>Signals</b> – Introduction, Signal Concepts, signal Function, Unreliable Signals  | 01               | 01        |
| b  | Interrupted System call ,Reliable-Signal Terminology and Semantics, kill and raise Functions, alarm and pause Functions  | 02               | 01        |
| c  | Signal Sets- sigemptyset, sigfillset, sigaddset, sigdelset, sigismember, sleep Function  | 01               | 01        |
| d  | <b>Threads</b> – Introduction, Thread Concepts, Thread Identification- pthread_equal, pthread_self, Thread Creation- pthread_create, Thread Termination- pthread_exit, pthread_join, pthread_cancel, pthread_cleanup_push, pthread_cleanup_pop, pthread_detach | 02               | 01        |
| e  | Thread Synchronization-pthread_mutex_init, pthread_mutex_destroy, pthread_mutex_lock, pthread_mutex_trylock, pthread_mutex_unlock  | 01               | 01        |
| f  | <b>Daemon Processes</b> – Introduction, Daemon Characteristics, Coding Rules, Error Logging  | 01               | 01        |

**References:**

|   |  |
|---|--|
| 1 | W. Richard Stevens and Stephen A. Rago, Advanced Programming in the UNIX Environment, 2/E, Pearson Education |
|---|--|

## Unit - V

| 5. |   |   | Lect<br>required | Ref No |
|----|---|---|------------------|--------|
|    | a | <b>Interprocess Communication</b> – Introduction, Pipes, FIFOs- mkfifo, XSI IPC, identifiies and keys, ftok                   | 02               | 01     |
|    | b | Message Queues- msgget, msgctl, msgsnd, msgrcv, Semaphores- semget, semctl, semop, Shared Memory-shmget, shmctl, shmat, shmdt | 02               | 01     |
|    | c | <b>Network IPC-</b> Socket Descriptors- socket, shutdown  | 01               | 01     |
|    | d | Associating Addresses with sockets- bind  | 01               | 01     |
|    | e | Connection Establishment- connect, listen, accept   | 01               | 01     |
|    | f | Data Transfer- send, recv   | 01               | 01     |

# Artificial Intelligence & Expert System

Teacher, Paper setter and Examiner should follow the guidelines as given below.

## Unit – I

Teacher should facilitate basic of Artificial Intelligence:

|   |  |   |                  |        |
|---|--|---|------------------|--------|
| 1 | <b>Introduction to Artificial Intelligence</b> |   | Lecture required | Ref No |
|   | a.   | Definitions of AI, History, AI representation                                     | 02               | 1      |
|   | b.   | Turing test   | 01               | 1      |
|   | c  | AI Problem and Techniques: Problem as State Space Search, Problem Characteristics | 01               | 1      |
|   | d.   | Production System: Production Rules ,Water Jug Problem                            | 02               | 1      |
|   | e.   | Heuristic Search Techniques: BFS, DFS, A*, AO*, Mean Ends Analysis                | 02               | 1      |

### Text Book:

|   |  |

| 1 | Elaine Rich, Kevin Knight and Shivshankar B. Nair , "Artificial Intelligence", 3 <sup>rd</sup> Edition TMH |
|---|--|

## Unit-II

Teacher should facilitate Process of Knowledge Engineering:

|    |                              |  |                  |        |
|----|------------------------------|--|------------------|--------|
| 2. | <b>Knowledge Engineering</b> |  | Lecture required | Ref No |
|    | a.                           | Knowledge Representation Issues  | 02               | 1      |
|    | b.                           | Knowledge Representation using Predicate Logic   | 02               | 1      |
|    | c                            | Knowledge Representation using Rules   | 02               | 1      |
|    | d.                           | Weak and Strong Filler Structures for Knowledge : Semantic net, Frames, Script, Conceptual dependency. | 02               | 1      |

### Text Book:

|   |  |
|---|--|
| 1 | Elaine Rich, Kevin Knight and Shivshankar B. Nair , "Artificial Intelligence", 3 <sup>rd</sup> Edition TMH |
|---|--|

## Unit –III

Teacher should facilitate basic of Game Playing and Planning

|    |                                  |   |                  |        |
|----|----------------------------------|---|------------------|--------|
| 3. | <b>Game Playing and Planning</b> |   | Lecture required | Ref No |
|    | a.                               | Minimax Search with Additional Refinements            | 02               | 1      |
|    | b.                               | Overview of Planning                                  | 01               | 1      |
|    | c.                               | Goal Stack Planning : Block World, STRIPS             | 02               | 1      |
|    | d.                               | Nonlinear, Hierarchical and other Planning Techniques | 02               | 1      |
|    | e.                               | Perception and Action                                 | 01               | 1      |

**Text Book:**

|   |   |
|---|---|
| 1 | Elaine Rich, Kevin Knight and Shivashankar B. Nair , "Artificial Intelligence", 3 <sup>rd</sup> Edition TMH |
|---|---|

**Unit-IV**

Teacher should facilitate basic of Understanding , NLP and Learning

|    |  |                  |        |
|----|--|------------------|--------|
| 4. | <b>Understanding , NLP and Learning</b>  | Lecture required | Ref No |
| a. | Understanding as a Constraint satisfaction : Waltz's algorithm, Constraint determination, Trihedral and Nontriheral figures labelling. | 02               | 1      |
| b. | Natural Language Processing steps .  | 02               | 1      |
| c. | Learning techniques .  | 02               | 1      |
| d. | Neural Network Learning :Biological neuron, Artificial neuron, Architecture of Neural Network and Learning                             | 02               | 1      |

**Text Book:**

|   |   |
|---|---|
| 1 | Elaine Rich, Kevin Knight and Shivashankar B. Nair , "Artificial Intelligence", 3 <sup>rd</sup> Edition TMH |
|---|---|

**Unit-V**

Teacher should facilitate basic of Expert Systems

|    |   |                  |        |
|----|---|------------------|--------|
| 5. | <b>Expert Systems</b>                                     | Lecture required | Ref No |
| a. | Architecture of Expert System                             | 01               | 1      |
| b. | Utilization and functionality                             | 02               | 1      |
| c. | Knowledge Representation and Utilization in Expert System | 01               | 1      |
|    |   |                  |        |
| d. | Two Case Studies of Expert System                         | 01               | 1      |
| e. | Expert System Shell                                       | 02               | 1      |
| f. | Applications of Expert System                             | 01               | 1      |

# Software Engineering & Project Management (Inter Disciplinary Elective)

Teacher, Paper setter and Examiner should follow the guidelines as given below.

## Unit – I

Teacher should facilitate basic of Software Engineering:

|   |   |  |                  |        |
|---|---|--|------------------|--------|
| 1 | <b>Introduction to Software Engineering</b> |  | Lecture required | Ref No |
|   | a.  | Nature of Software                                     | 01               | 1      |
|   | b.  | Software Process                                       | 01               | 1      |
|   | c.  | Software Engineering Practice                          | 01               | 1      |
|   | d.  | Software Myths   | 01               | 1      |
|   | e.  | Generic Process model                                  | 01               | 1      |
|   | f.  | Process Assessment and Improvement                     | 01               | 1      |
|   | g.  | Perspective Process Models, Specialized Process Models | 01               | 1      |
|   | h.  | Personal and Team Process Models                       | 01               | 1      |

# Enterprise Resource Planning and SAP (Inter Disciplinary Elective)

Teacher, Paper setter and Examiner should follow the following guidelines.

## Unit - I

Teacher should facilitate learning of Enterprise Resource Planning, Enterprise and advantages of ERP.

| 1. | ERP Introduction   | Lect required | Ref No |
|----|--|---------------|--------|
| a  | Enterprise – An Overview: Introduction, Business Function and Business Processes, Integrated management Information, Role of enterprising ERP system, Business Modeling, Integrated data model | 04            | 01     |
| b  | Introduction to ERP: Introduction, Common ERP Myths, A Brief History of ERP, The Advantages of ERP, Roadmap for the successful ERP Implementation  | 04            | 01     |

# Advanced Computer Architecture (Elective I)

Teacher, Paper setter and Examiners should follow the guidelines as given below.

## Unit – I

| 1. | Introduction to Parallel Processing  | Lectures Required | Ref. No. |
|----|--|-------------------|----------|
| a  | <b>Evolution of parallel processors with future trends &amp; applications:</b><br>Generation of Computer System, Trends towards parallel processing                          | 01                | 2        |
| b  | <b>Parallelism in Uniprocessor system:</b> Basic Uniprocessor Architecture, Parallel Processing Mechanisms, Balancing subsystem bandwidth, Multiprogramming and Time sharing | 02                | 2        |
| c  | <b>Parallel computer structure:</b> Pipeline Computers, Array computers, Multiprocessor system, Performance of Parallel Computers, Dataflow and new concepts                 | 01                | 2        |
| d  | <b>Architectural classification schemes:</b> Multiplicity of Instruction-Data stream, Serial versus parallel processing, Parallelism versus Pipeline                         | 01                | 2        |
| e  | System Attributes to Performance   | 01                | 1,2      |
| f  | <b>Program and Network Properties:</b> Condition of Parallelism, Program Partitioning and scheduling, Program flow mechanisms, System interconnect architecture              | 02                | 1        |

# Human Computer Interaction (Elective I)

## Unit - I

Teacher should facilitate learning of basics of human computer interaction

| 1. | Introduction and Basic Concept  | Lecture required | Ref No |
|----|---|------------------|--------|
|    | <b>Introduction</b><br>a Importance of user interface, Defining the user interface, Importance of good design, GUI-Benefits of good UI.     | 02               | 01,02  |
|    | <b>Graphical User Interface</b><br>b Concept of Direct Manipulation, Indirect manipulation<br>Graphical systems :Advantage and disadvantage | 02               | 02     |
|    | c Characteristics of Graphical User Interface.  | 02               | 02     |
|    | <b>The web user Interface</b><br>d GUI versus web page design, Characteristics of Web UI.   | 02               | 02     |

## Unit - II

Teacher should facilitate learning of Design process

| 1. | Design Process   | Lecture required | Ref No |
|----|--|------------------|--------|
|    | <b>The Human interaction with computer</b><br>a Understand how people interact with computers, why people have trouble with computers, responses to poor design, people and their tasks.   | 02               | 02     |
|    | <b>Important Human Characteristics in design</b><br>b Perception, memory, sensory storage, visual Acuity, foveal and peripheral vision, information processing, mental models, movement control learning, skill, individual Differences.   | 02               | 02     |
|    | <b>Human Consideration in Design</b><br>c User's knowledge and experience task and needs, psychological characteristics, physical characteristics.   | 02               | 02     |
|    | <b>Human Interaction Speeds</b><br>d   | 01               | 02     |
|    | <b>Understand the Principles of Good Screen Design</b><br>e Human consideration in screen design ,Interface design goals, screen meaning and purpose of organizing screen elements clearly and meaning fully, Ordering screen data and control, screen navigating and flow, amount of information, focus and emphasis. | 03               | 02     |

### Unit – III

Teacher should facilitate learning of Models of HCI.

| 1. | Models of HCI   | Lecture required | Ref No |
|----|---|------------------|--------|
| a  | <b>Cognitive models</b><br>Introduction, goal and task hierarchies, GOMS.           | 02               | 01     |
| b  | <b>Linguistics Models</b><br>BNF, Task action Grammar                               | 02               | 01     |
| c  | <b>Physical and Device Models</b><br>Keystroke level model, three state level model | 02               | 01     |
| d  | <b>Cognitive Architecture</b><br>The problem space, interactive cognitive subsystem | 02               | 01     |

### Unit – IV

Teacher should facilitate learning of interaction styles

| 1. | Interaction styles   | Lecture required | Ref No |
|----|--|------------------|--------|
| a  | <b>Menus</b><br>Structure of menu, functions of menus, contents of menus, formatting of menus, selecting menu choices, kinds of graphical menus. | 02               | 02     |
| b  | <b>Windows</b><br>Components of windows, window presentation styles, types of windows, window operations.  | 02               | 02     |
| c  | <b>Device Based controls</b><br>Characteristics of device based controls, trackball, joystick, graphic tablet, touch screen                      | 02               | 02     |
| d  | <b>Screen Based controls</b><br>Operable control, text boxes, selection controls, combo boxes  | 02               | 02     |

### Unit - V

Teacher should facilitate learning of communication

| 1. | Communication  | Lecture required | Ref No |
|----|--|------------------|--------|
| a  | <b>Text messages</b><br>Words, sentences, messages ,text word, text for web pages  | 02               | 02     |
| b  | <b>Feedback and guidance</b><br>Providing proper feedback, guidance and assistance.  | 02               | 02     |
| c  | <b>Graphics icons and images</b><br>Icons- Kinds of icon, Characteristics of icons, Influences on icon usability, choosing icons, creating and drawing images, icon animation and audition, the design process, screen presentation.<br>Multimedia- graphics, images, pictures, video, animation, auditions, diagram, drawings, combining mediums. | 02               | 02     |
| d  | <b>Colors</b><br>RGB, HSV, Dithering, color uses ,possible problems with color, color and human vision, choosing color.  | 02               | 02     |

# Advanced Computer Network (Elective I)

Teacher, Paper setter and Examiner should follow the following guidelines.

## Unit - I

Teacher should facilitate learning wireless Networking, Overview of 802.11 Networks, 802.11 MAC Fundamentals.

| <b>1</b> | <b>Wireless Networking, Overview of 802.11 Networks, 802.11 MAC Fundamentals.</b>  | <b>Number Lecturers Required</b> | <b>Ref No</b> |
|----------|--|----------------------------------|---------------|
|          | a Introduction to wireless Networking: Why Wireless? What makes Wireless Network different? A Network by Any other name.   | 2                                | 1             |
|          | b Overview of 802.11 Networks: IEEE 802 Network Technology Family tree, 802.11 Nomenclature and design, 802.11 Network Operation, Mobility Support.  | 2                                | 1             |
|          | c 802.11 MAC Fundamentals: Challenges for the MAC, MAC Access Modes and Timing, Contention-Based Access Using the DCF, Fragmentation and Reassembly, Frame Format, Encapsulation of Higher-Layer Protocols Within 802.11, Contention-Based Data Service, Frame Processing and Bridging | 4                                | 1             |

### Unit – V

Teacher should facilitate learning Routing Protocols for Ad Hoc Wireless Networks, Wireless Sensor Networks.

| 5 | Routing Protocols for Ad Hoc Wireless Networks, Wireless Sensor Networks |  | Number Lecturers Required | Ref No |
|---|--|--|---------------------------|--------|
|   | a  | Routing Protocols for Ad Hoc Wireless Networks: Table-Driven Routing Protocols, On Demand Routing Protocols, Hybrid Routing Protocols, Routing Protocols with Efficient Flooding Mechanisms, Power-Aware Routing Protocols | 4                         | 2      |
|   | b  | Wireless Sensor Networks: Introduction, Sensor Networks Architecture, Data Dissemination, Data Gathering, MAC Protocols for Sensor Networks, Location Discovery, Quality of a Sensor Network.                              | 4                         | 2      |

# Embedded System

Teacher, Paper setter and Examiner should follow the guidelines as given below.

## Unit – I

Teacher should facilitate basic of Embedded System and its Applications:

|   |  |   |                  |        |
|---|--|---|------------------|--------|
| 1 | <b>Introduction to Embedded System</b> |   | Lecture required | Ref No |
|   | a.                                     | What is Embedded System?  | 01               | 1      |
|   | b.                                     | Application areas   | 01               | 1      |
|   | c.                                     | Categories of the Embedded System   | 01               | 1      |
|   | d.                                     | Overview of Embedded System architecture  | 01               | 1      |
|   | e.                                     | Specialties of Embedded System  | 01               | 1      |
|   | f.                                     | Recent trends in Embedded System  | 01               | 1      |
|   | g.                                     | Hardware architecture-CPU, Memory, Clock Circuitry, WDT, Chip Select, Communication Interfaces. | 01               | 1      |
|   | h.                                     | Communication Protocols-I <sup>2</sup> C, SPI & CAN   | 01               | 1      |

# Advanced UNIX Programming Lab

## LAB COURSE CONTENT

Teacher should facilitate learning following lab experiments:

|  | Group A |   | Lab hours required |
|--|---------|---|--------------------|
|  | 1       | <b>Write a program for File Management (any 7 option)</b><br>File management consist of creating file, reading, writing into file , removing file etc.  | 02                 |
|  | 2       | <b>Write a program for Simulation of various commands(any7 option)</b><br>Various unix command are implemented.   | 02                 |
|  | 3       | <b>Write a program to display user and system information</b><br>User functions like getuid, getgid are used for user information and uname used for system information.                          | 02                 |
|  | 4       | <b>Write a program to <u>display file status flags on specified descriptor</u></b><br>Using fstat function file status is display.  | 02                 |
|  | 5       | <b>Write a program using atexit function</b><br>Program consists of atexit function to create exit handler.   | 02                 |
|  | 6       | <b>Write a program for process creation using fork and vfork function</b><br>Process is created using fork and vfork function   | 02                 |
|  |         |   |                    |
|  | Group B |   |                    |
|  | 1       | <b>Write a program for Inter Process Communication using pipe.</b><br>Using pipe and fork function two process communicate with each other using this program.                                    | 02                 |
|  | 2       | <b>Write a program for catching of Signals</b><br>More than one signal catch with signal function.  | 02                 |
|  | 3       | <b>Write a program for Daemon process</b><br>Daemon coding rules are implemented.   | 02                 |
|  | 4       | <b>Write a program for multithreading</b><br>More than one thread created with thread create function and then they are use for multithreading to implement other task.                           | 02                 |
|  | 5       | <b>Write a program for client server communication using socket</b><br>Socket related function like bind, connect, listen, accept are used to create client and server program for communication. | 02                 |
|  | 6       | <b>Write a program for Inter Process Communication using Message Queue</b><br>Message queue is created and by exchanging message to process can communicate with each other.                      | 02                 |

**Note:-**

Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.

# Embedded System Lab

## LAB COURSE CONTENT

Teacher should facilitate learning following lab experiments:

|  | <b>Group A</b> |   | <b>Lab hours required</b> |
|--|----------------|---|---------------------------|
|  | 1              | Writing basic C-programs for I/O operations.  | 02                        |
|  | 2              | Program to interface LCD.   | 02                        |
|  | 3              | Program to demonstrate I2C Protocol.  | 02                        |
|  | 4              | Program to demonstrate CAN Protocol.  | 02                        |
|  | 5              | Program to interface Keyboard and display key pressed on LCD.   | 02                        |
|  | 6              | Program to interface stepper motor.   | 02                        |
|  | 7              | Program to interface Graphics LCD.  |                           |
|  |                |   |                           |
|  | <b>Group B</b> |   |                           |
|  | 1              | Program to interface Touch Panel.   | 02                        |
|  | 2              | Program to implement AT commands and interface of GSM modem.  | 02                        |
|  | 3              | Interfacing 4 x 4 matrix keyboards and 16 x 2 character LCD display to microcontroller /Microprocessor and writing a program using RTOS for displaying a pressed key. | 02                        |
|  | 4              | Writing a scheduler / working with using RTOS for 4 tasks with priority. The tasks may be keyboard LCD, LED etc. and porting it on microcontroller/ microprocessor.   | 02                        |
|  | 5              | Implement a semaphore for any given task switching using RTOS on microcontroller board.   | 02                        |
|  | 6              | Create two tasks, which will print some characters on the serial port, Start the scheduler and observe the behavior.  | 02                        |
|  | 7              | Program for exploration of (Process creation, Thread creation) using Embedded Real Time Linux.  | 02                        |

# Advanced Computer Architecture Lab (Elective I)

## LAB COURSE CONTENT

Teacher should facilitate learning following lab experiments:

(Minimum **FOUR** Experiments each from below list)

|  | <b>Group A</b> |  | <b>Lab<br/>hours<br/>required</b> |
|--|----------------|--|-----------------------------------|
|  | 1              | Study of CRAY-1 System Architecture                      | 02                                |
|  | 2              | Implement instruction pipeline                           | 02                                |
|  | 3              | Implementation of matrix multiplication using threading. | 02                                |
|  | 4              | Implementation of hyper quick sort algorithm.            | 02                                |
|  | 5              | Study of PARAM Supercomputer.                            | 02                                |
|  | 6              | Study of data flow computer.                             | 02                                |

### Reference Books:

1. Kai Hwang, "Advance Computer Architecture, Parallelism, Scalability, Programmability", Mc-Graw Hill Publication.
2. Kai Hwang and Faye A Briggs, "Computer Architecture and Parallel Processing"

### Note:-

Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.

# Android Programming Lab (Elective I)

## LAB COURSE CONTENT

Teacher should facilitate learning following lab experiments:

|    |   | Lab hours required |
|----|---|--------------------|
| 1  | Program to show use of UI elements  | 02                 |
| 2  | Program to show demo of layouts   | 02                 |
| 3  | Program to create Menus and Dialog box.   | 02                 |
| 4  | Program to show how to use intents (implicit and explicit)                        | 02                 |
| 5  | Program to work with database (create, insert ,delete ,update ,select operations) | 02                 |
| 6  | Program to show how to use notifications  | 02                 |
| 7  | Program to make call, send and receive SMS.                                       | 02                 |
| 8  | Program to work with Google maps.   | 02                 |
| 9  | Program to play Audio and video files   | 02                 |
| 10 | Program to send and receive file using Bluetooth                                  | 02                 |
| 11 | Program to show how to use Networking and web-services in Android                 | 02                 |

### Note:

- Concerned faculty should suitably frame at least any **06 practical** assignments out of the above list.
- Every assignment should include print out of code with proper comments and output.
- Every student is required to submit the assignments in the form of journal

### Text Books/Reference Books:

1. Reto Meier, "Professional Android™ Application Development", Wrox Publications
2. Lauren Dercy and Shande Conder, "Sams teach yourself Android application development", Sams publishing
3. Hello Android, Introducing Google's Mobile Development Platform, Ed Burnette, Pragmatic Programmers, ISBN: 978-1-93435-617-3

### Note:-

- Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.

# Human Computer Interaction Lab (Elective I)

## LAB COURSE CONTENT

**(Note: Minimum FOUR Experiments each from group A and B)**

### Group A

1. Know your client –  
Children (3-4 years of age): An application to teach Alphabets , shapes.
2. Learn HCI design principles –Identify 3 different websites catering to one specific goal (e.g. Goal – on-line shopping and 3 different websites – ebay, amazon, flipkart, zovi, myntra) and perform a competitive analysis on them to understand how each one caters to the goal, the interactions and flow of the payment system and prepare a report on the same.
3. Learn the importance of menus and navigation – website redesign: News websites like CNN are always cluttered with information
4. Menu designing: Choose a unique domain, design a menu and show how it can be accommodated on an interface.
5. Icon designing: Choose a unique domain, design a few icons and show how it can be accommodated on an interface.
6. Understand the need of colors and animation – web site for an artist: A celebrity in some form of art like music, dance, painting, martial arts, etc (not actors). This site will be used to display his works and should portray his character.
7. Any other new relevant topics covering the above syllabus

### Group B

1. Online shopping website
2. E -learning web site
3. Video/ Audio on demand web site
4. Travel reservation system
5. ATM Interface
6. Online trading on stock market
7. University web site
8. Placement agency

**(Note:** A project with a team of minimum 2 and maximum 3 students. The purpose of the project is focused on User interaction and NOT on the implementation of the entire project. Explain technology in interface Design; explain the user interface design process; coloring guidelines; Speech Recognition and speech generation; Types of windows; Components of UI, such as Text Boxes, List Boxes, Messages, Icons, Multimedia; Mental models; Importance of the mental models in UI design.)

### Text Books:

1. Alan Dix, J. E. Finlay, G. D. Abowd, R. Beale “Human Computer Interaction”, Prentice Hall.
2. Wilbert O. Galitz, “The Essential Guide to User Interface Design”, Wiley publication.

**Reference Books:**

2. Donald A. Norman, "The design of everyday things", Basic books.
3. Rogers Sharp Preece, "Interaction Design:Beyond Human Computer Interaction", Wiley.
4. Guy A. Boy "The Handbook of Human Machine Interaction", Ashgate publishing Ltd.
5. Alan Cooper, Robert Reimann, David Cronin, "About Face3: Essentials of Interaction design", Wiley publication.
6. Jeff Johnson, "Designing with the mind in mind", Morgan Kaufmann Publication.

**Note:-**

- Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.

## Advanced Computer Network Lab (Elective I)

### LAB COURSE CONTENT

|   |  | Lab hours required |
|---|--|--------------------|
| 1 | Setting up wireless network with and without infrastructure support.   | 02                 |
| 2 | Configuring Access Point with bridging mode (Point to Point and Point to Multi Point).                                     | 02                 |
| 3 | Configuring Routing between wired and wireless Networks.   | 02                 |
| 4 | Configuring Security in wireless network with and without infrastructure support.  | 02                 |
| 5 | At least 3 lab assignments based on above syllabus using any network simulator such as NS2, OPNET, OMNET, NetSim, NS3 etc. | 06                 |

Concerned staff members should suitably frame the term work at least FOUR based on above syllabus. Practical Examination should be conducted based on the above syllabus and the term work submitted in the form of journal.

**Note:-**

Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.

# Compiler Design

Teacher, Paper setter and Examiners should follow the guidelines as given below.

## Unit – I

Teacher should facilitate learning of introductory of compiler design.

| Sr. No. |    | Introduction                       | Lecture Required | Ref. No. |
|---------|----|------------------------------------|------------------|----------|
| 1       | a. | Language Processors                | 1                | 1        |
|         | b. | The Structure of a Compiler        | 1                | 1        |
|         | c. | Application of Compiler Technology | 1                | 1        |
|         | d. | The Role of Lexical Analyzer       | 1                | 1        |
|         | e. | Specification of Tokens            | 2                | 1        |
|         | f. | Recognition of Tokens              | 1                | 1        |
|         | g. | Lexical Analyzer Generator LEX     | 1                | 1        |

|---|---|

# Data Warehousing & Mining

Teacher, Paper setter and Examiner should follow the guidelines as given below.

## Unit – I

Teacher should facilitate Introduction to Data Warehousing:

|   |   |  |                  |        |
|---|---|--|------------------|--------|
| 1 | <b>Introduction to Data Warehousing</b> |  | Lecture required | Ref No |
|   | a.                                      | What is a Data Warehouse?  | 01               | 1      |
|   | b.                                      | A Multidimensional data model  | 01               | 1      |
|   | c.                                      | Data Warehouse Architecture  | 01               | 1      |
|   | d.                                      | From Data Warehousing to Data Mining                                 | 01               | 1      |
|   | e.                                      | Why preprocess data  | 01               | 1      |
|   | f.                                      | Data Cleaning  | 01               | 1      |
|   | g.                                      | Data Integration and Transformation                                  | 01               | 1      |
|   | h.                                      | Data Reduction, Data discretization and concept hierarchy generation | 01               | 1      |

### References:

# Software Metrics and Quality Assurance (Elective II)

Teacher, Paper setter and Examiner should follow the following guidelines.

## Unit - I

Teacher should facilitate learning of Basic Concepts of Software Metrics and Quality Assurance.

| 1. | Introduction to Software Measurement:                       | Lect required | Ref No |
|----|---|---------------|--------|
| a  | Measurement in everyday life                                | 01            | 01     |
| b  | Measurement in Software Engineering                         | 01            | 01     |
| c  | The scope of software metrics                               | 01            | 01     |
| d  | The representational theory of measurement                  | 01            | 01     |
| e  | Measurement and Models                                      | 01            | 01     |
| f  | Measurement scales and scales types                         | 01            | 01     |
| g  | Meaningfulness in measurement                               | 01            | 01     |
| h  | Classifying software measures & Determining what to measure | 01            | 01     |

# Distributed Systems (Elective II)

Teacher, Paper setter and Examiner should follow the following guidelines.

## Unit - I

Teacher should facilitate learning of Introduction to Distributed Systems, Types of Distributed Systems, Architectural Styles and System Architectures.

| 1. | Introduction to Distributed Systems and Architectures |  | Lect required | Ref No  |
|----|---|--|---------------|---------|
|    | a   | Introduction: Definition of a Distributed system.<br>Goals: Making Resources Accessible, Distribution Transparency, Openness, Scalability, Pitfalls. | 01            | 01 & 02 |
|    | b   | Types of Distributed System: Distributed Computing Systems, Distributed Information Systems ,Distributed Pervasive Systems.                          | 02            | 01 & 02 |
|    | c   | Architectural Styles: Layered architectures, Object-based architectures, Data-centered architectures, Event-based architectures.                     | 02            | 01 & 02 |
|    | d   | System Architectures: Centralized Architectures, Decentralized Architectures, Hybrid Architectures.  | 03            | 01 & 02 |

## References:

# Mobile Computing (Elective III)

Teacher, Paper setter and Examiners should follow the guidelines as given below.

## Unit - I

Teacher should facilitate learning of introduction of Mobile Computing and its architecture

| 1. | Introduction   | Lectures Required | Ref. No. |
|----|--|-------------------|----------|
| a  | Mobility of Bits and Bytes: Convergence leading to ICT<br>Wireless -The Beginning: Evolution of Wireless Networks,<br>Evolution of wireless data, Evolution of wireless LAN,<br>Evolution of wireless PAN. | 01                | 01       |
| b  | Mobile Computing: Mobile Computing Functions, Mobile<br>Computing Devices. Dialogue Control, Networks: Wireline<br>Networks, Wireless Networks, Ad-hoc Networks, Bearers                                   | 01                | 01       |
| c  | Middleware and Gateways: Communication Middleware,<br>Transaction Processing Middleware, Behavior<br>Management Middleware, Communication Gateways   | 01                | 01       |
| d  | Application and Services (Contents), Developing Mobile<br>Computing Applications: New mobile applications,<br>Making legacy application mobile   | 02                | 01       |
| e  | Security in Mobile Computing,<br>Standards - why is it Necessary? : Who makes the<br>standards, Standard Bodies  | 01                | 01       |
|    | <b>Mobile Computing Architecture</b>   |                   |          |
| f  | Internet - The Ubiquitous Network, Architecture for<br>mobile computing,<br>Three Tier Architecture: presentation(Tier1),Application<br>Tier(Tier2),Data Tier(Tier 3)                                      | 02                | 01       |

## Unit – III

Teacher should facilitate learning of GSM and GPRS

| 3. | Global System for Mobile Communications (GSM) |  | Lectures Required | Ref. No. |
|----|---|--|-------------------|----------|
|    | a   | Global System for Mobile Communications, GSM Architecture, GSM Entities: Mobile Station, The Base Station Subsystem, The Network and Switching Subsystem, The Operation and Support Subsystem (OSS), Message Center.   | 02                | 01       |
|    | b   | Call Routing in GSM: An example, PLMN Interfaces, GSM Addresses and Identifiers  | 01                | 01       |
|    | c   | Network Aspects in GSM: Handover, Mobility Management, Roaming Example, GSM Frequency Allocation, Authentication and Security: The MS Authentication Algorithm A3, The Voice Privacy Key Generation Algorithm A8, The Strong Over-the-Air Voice-Privacy Algorithm A5/1   | 01                | 01       |
|    | <b>General Packet Radio Service (GPRS)</b>    |  |                   |          |
|    | d   | Introduction, GPRS and Packet Data Network: Capacity and other end user aspects, Quality of service (QoS), Integral Part of Future 3G systems, GPRS Network Architecture: GPRS Network Enhancements, Channel Coding, Transmission Plane Protocol Architecture, security. | 02                | 01       |
|    | e   | GPRS Network Operations: Attachment and Detachment Procedure, Mobility Management, Routing, Communicating with IP Networks.  | 01                | 01       |
|    | f   | Data Services in GPRS: GPRS Handsets, Device Types, Bearers in GPRS, Application for GPRS: Generic Application, GPRS Specific Applications. Limitations of GPRS, Billing and Charging in GPRS: Tariffing, Billing  | 01                | 01       |

## Unit – IV

Teacher should facilitate learning of WAP, CDMA and 3G

| 4. | WAP  | Lectures Required | Ref. No. |
|----|--|-------------------|----------|
| a  | Introduction: Evolution of Wireless Data and WAP, Networks for WAP. WAP: WAP Application Environment(WAE), User Agent, User Agent Profile (UAProf),Wireless Markup Language(WML),WML Script, Wireless Telephony Applications(WTA,WTAI),WAP Push Architecture, The Push Framework, Wireless Session Protocol(WSP), Wireless Transaction Protocol(WTP),Wireless Transport Layer Security (WTLS),Wireless Data Protocol (WDP),WAP Gateway | 02                | 01       |
| b  | MMS: MMS Architecture, MMS Transaction Flows, SMIL (Synchronized Multimedia Integration Language), MMS Interconnection, Interoperability and Roaming, MMS Device Management and Configuration.<br>GPRS Applications: Digital Rights Management, OMA Digital Rights Management  | 02                | 01       |
|    | <b>CDMA and 3G</b>   |                   |          |
| c  | Introduction: How it started, Spread Spectrum Technology: Direct Sequence Spread Spectrum (DSSS).  | 01                | 01       |
| d  | IS-95: Speech and Channel Coding,IS-95 Architecture,IS-95 Channel Structure,IS-95 Call Processing, Authentication and Security, Handoff and Roaming,IS-95 Channel Capacity   | 01                | 01       |
| e  | CDMA versus GSM, Wireless Data: Short Message Service, Third Generation Networks: IMT- 2000,CDMA-2000,UMTS/WCDMA, Fixed Wireless   | 01                | 01       |
| f  | Applications on 3G: 3G Specific Applications.  | 01                | 01       |

### Reference:

# Real Time Systems (Elective III)

Teacher, Paper setter and Examiner should follow the guidelines as given below.

## Unit – I

Teacher should facilitate basic of Real Time Systems and its Computing:

|   |  |  |                  |        |
|---|--|--|------------------|--------|
| 1 | <b>Introduction To Real Time Systems</b> |  | Lecture required | Ref No |
|   | a.                                       | Issues in Real Time Computing              | 01               | 1      |
|   | b.                                       | Issues in Real Time Computing              | 01               | 1      |
|   | c.                                       | Structure of Real Time System              | 01               | 1      |
|   | d.                                       | Structure of Real Time System              | 01               | 1      |
|   | e.                                       | Performance Measures for Real Time Systems | 01               | 1      |
|   | f.                                       | Performance Measures for Real Time Systems | 01               | 1      |
|   | g.                                       | Estimating Program Run Times               | 01               | 1      |
|   | h.                                       | Estimating Program Run Times               | 01               | 1      |

### References:

|   |  |
|---|--|
| 1 | C.M Krishna and Kang G. Shin, Real Time Systems, TMH     |
| 2 | Jane W.S Liu, Real time systems, Pearson education, 2003 |

## Unit-II

Teacher should facilitate Algorithms of Real Time Systems:

|    |  |   |                  |        |
|----|--|---|------------------|--------|
| 2. | <b>Task Assignments and Scheduling</b> |   | Lecture required | Ref No |
|    | a.                                     | Classical Uniprocessor Scheduling               | 01               | 1      |
|    | b.                                     | Task Assignment-Utilization balancing algorithm | 01               | 1      |
|    | c.                                     | Next Fit and Bin Packing Assignment Algorithms  | 01               | 1      |
|    | d.                                     | Myopic offline Scheduling                       | 01               | 1      |
|    | e.                                     | Focused addressing and bidding(FAB) Algorithm   | 01               | 1      |
|    | f.                                     | Buddy Strategy                                  | 01               | 1      |
|    | g.                                     | Buddy Strategy                                  | 01               | 1      |
|    | h.                                     | Assignments with Precedence Conditions          | 01               | 1      |

### References:

|   |  |
|---|--|
| 1 | C.M Krishna and Kang G. Shin, Real Time Systems, TMH     |
| 2 | Jane W.S Liu, Real time systems, Pearson education, 2003 |

## Unit –III

Teacher should facilitate Characteristics of Real Time Systems:

|    |  |                                  |                  |        |
|----|--|----------------------------------|------------------|--------|
| 3. | <b>Real Time Programming Languages &amp; Tools</b> |                                  | Lecture required | Ref No |
|    | a.   | Desired language characteristics | 01               | 2      |

|    |  |    |   |
|----|--|----|---|
| b. | Data typing, Control structures              | 01 | 2 |
| c. | hierarchical decomposition                   | 01 | 2 |
| d. | Packages                                     | 01 | 2 |
| e. | Run Time Error Handling                      | 01 | 2 |
| f. | Multitasking                                 | 01 | 2 |
| g. | Task Scheduling & Timing Specification       | 01 | 2 |
| h. | Programming Environment and Run Time Support | 01 | 2 |

# Compiler Design Lab

## LAB COURSE CONTENT

**(Note: Minimum Three Experiments from group A and THREE from group B.)**

|  | <b>Group A</b> |  | <b>Lab hours required</b> |
|--|----------------|--|---------------------------|
|  | 1              | Implement a lexical analyzer for a subset of C using LEX<br>Implementation should support Error handling   | 02                        |
|  | 2              | Implement a lexical analyzer of identification of numbers (Numbers can be binary, octal, decimal, hexadecimal, float or exponential )  | 02                        |
|  | 3              | Write an ambiguous CFG to recognize an infix expression and implement a parser that recognizes the infix expression using YACC. Provide the details of all conflicting entries in the parser table generated by LEX and YACC and how they have been resolved | 02                        |
|  | 4              | Implement a Calculator using LEX and YACC.   | 02                        |
|  | 5              | Implementation of Syntax Tree  | 02                        |
|  |                |  |                           |
|  | <b>Group B</b> |  |                           |
|  | 1              | Implementation of Context Free Grammar   | 02                        |
|  | 2              | Design of a Predictive parser  | 02                        |
|  | 3              | Implementation of code generator   | 02                        |
|  | 4              | Implementation of code optimization for Common sub-expression elimination, Loop invariant code movement.   | 02                        |
|  | 5              | Implement Deterministic Finite Automata  | 02                        |

### Note:-

- Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.

# Data Warehousing Lab

## LAB COURSE OUTLINE

|  | Group A |   | Lab hours required |
|--|---------|---|--------------------|
|  | 1       | Develop a program to construct a multidimensional data model (Star, Snowflake or Fact constellations) | 02                 |
|  | 2       | 2. Develop a program to implement data pre-processing techniques.                                     | 02                 |
|  | 3       | 3. Develop a program to implement data integration techniques.  | 02                 |
|  | 4       | 4. Implement Apriori algorithm for frequent item set.   | 02                 |
|  |         |   |                    |
|  | Group B |   |                    |
|  | 1       | Develop a program to implement data generalization and summarization techniques.                      | 02                 |
|  | 2       | Develop a program to extract association mining rules.  | 02                 |
|  | 3       | Develop a program for classification of data.   | 02                 |
|  | 4       | Develop a program for implementing one of the clustering techniques.                                  | 02                 |

**Note:** Concerned Faculty should suitably frame at least **6** practical assignments (**Three** from Group A and **Three** from Group B) out of the above list.  
Use open source Tool/ Technology (like Weka) for Laboratory Assignments is recommended.

# Software Metrics and Quality Assurance Lab

## LAB COURSE OUTLINE

Teacher should facilitate learning following lab experiments:

|  | Group  |   | Lab hours required |
|--|--|---|--------------------|
|  | Any 6 appropriate assignments based on given syllabus.<br>(Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.) |   |                    |
|  | OR   |   |                    |
|  | 1  | To perform the effort estimation based on project specification.  | 02                 |
|  | 2  | Program for finding Length of program<br>Implementation of program for finding Length of program using Lines Of Code.   | 02                 |
|  | 3  | Program for measuring Size of program using Albretch's Method.<br>Implementation of program for measuring size of program using Function Point Calculation Albrecht's method. | 02                 |
|  | 4  | Software testing using J-Meter testing tool.  | 02                 |
|  | 5  | Software testing using Selenium testing tool.   | 02                 |

### Text Books:

2. Swapna Kishore and Rajesh Naik, "ISO 9001:2000 for Software Organizations", TMH.

### Note:-

- Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.

# Distributed Systems Lab

## LAB COURSE OUTLINE

Teacher should facilitate learning of the following lab experiments:

|  | Name of the Experiment |   | Lab hours required |
|--|------------------------|---|--------------------|
|  | 1                      | Write a Program for Remote Procedure Call (RPC).                                      | 02                 |
|  | 2                      | Write a Program to implement Echo Client-Server application.                          | 02                 |
|  | 3                      | Write a Program to find length of given string using thread.                          | 02                 |
|  | 4                      | Simulate the Distributed Mutual Exclusion.  | 02                 |
|  | 5                      | Implementation of Distributed Chat Server.  | 02                 |
|  | 6                      | Simulate the function of Lamport's Logical Clock.                                     | 02                 |
|  | 7                      | Implementation of Date and Time server using Java RMI.                                | 02                 |
|  | 8                      | Implementation of server that adds given two values by the clients using Java RMI.    | 02                 |
|  | 9                      | Write a program for word count using Hadoop.  | 02                 |
|  | 10                     | Implement merge sort algorithm and run it using Hadoop for large data set.            | 02                 |
|  | 11                     | Write simulation program for synchronization using Bully and Ring election algorithm. | 02                 |

### Note:

- Concerned faculty should suitably frame at least **SIX practical** assignments out of the above list.
- Every assignment should include algorithm, print out of code with proper comments and output.
- Every student is required to submit the assignments in the form of journal.
- Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.

4. G. Sudha Sadasivam, Radha Shankarmani, "Middleware and Enterprise Integration Technologies ", Wiley Precise Textbook.
5. Tom white, "Hadoop: The Definitive Guide" , 2nd E, O'Reilly Media, 2011.

# Cryptography & Network Security Lab

## LAB COURSE OUTLINE

|  | Name of the Experiment |   | Lab hours required |
|--|------------------------|---|--------------------|
|  | 1                      | Write a Program to Implement Columandar Cipher Text                     | 02                 |
|  | 2                      | Write a Program to Implement Encryption/Decryption using Ceaser Cipher. | 02                 |
|  | 3                      | Write a Program to Simulate Diffie-Hellman Key Exchange                 | 02                 |
|  | 4                      | Write a Program to Implement Play Fair Cipher.                          | 02                 |
|  | 5                      | Write a Program for Encryption/Decryption using Rail Fence Technique    | 02                 |
|  | 6                      | Write a Program to Implement RSA Algorithm                              | 02                 |

Any FIVE lab assignments should be framed by concern staff member based on above syllabus.  
Any Programming Language C/C++/Java.

**Note:-**

- Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.

# Neural Networks and Fuzzy Logic Lab

## LAB COURSE CONTENT

**(Note: Minimum THREE Experiments each from group A and B)**

### **Group A**

- [1] Implementation of Perceptron Learning.
- [2] Implementation of McCulloch-Pitts model.
- [3] Implementation of Hopfield model.
- [4] Implement Delta rule.
- [5] Implement model for Multilayer Perceptron.

### **Group B**

- [1] Program to implement Crisp set.
- [2] Program to implement Fuzzy Sets.
- [3] Program to implement Relations.
- [4] Simulation of Neural supervised Learning in any soft Computing tool.
- [5] Simulation of Neural unsupervised Learning in any soft Computing tool.

### **Note:-**

- Use of Open Source Tool/Technology is recommended for laboratory assignments of concern subject.
