

**NORTH MAHARASHTRA UNIVERSITY,
JALGAON**

FACULTY OF SCIENCE

**SYLLABUS FOR
M.Sc. (PART-I)
IN BOTANY**

**To Be Implemented From
Academic Year 2017-18**

**NORTH MAHARASHTRA UNIVERSITY, JALGAON Syllabus for Theory and
Practical Courses for M.Sc. In Botany M.Sc. Part-I**

(w.e.f. Academic Year 2017-2018)

Semester-I

- BOT.101 Angiosperm Taxonomy
- BOT.102 Environmental Botany and Biostatistics
- BOT.103 Cytogenetics, and Molecular Biology
- BOT.104 Practical -I (Based on BOT.101)
- BOT.105 Practical -II (Based on BOT.102 and BOT.103)

Semester-II

- BOT.201 Diversity of Lower Cryptogams
- BOT.202 Diversity of Higher Cryptogams
- BOT.203 Plant Physiology and Biochemistry
- BOT.204 Practical -I (Based on BOT.201)
- BOT.205 Practical -II (Based on BOT.202 and BOT.203)

Note: i) Each theory course requires 05 lectures of 60 minutes each.

ii) Each practical course requires 02 practical's per week of 04 hours duration.

Semester -I
BOT. 101
ANGIOSPERM TAXONOMY

Total: 60 Lectures

Aims and Objectives:

- i) To study conceptual development of 'taxonomy' vis-à-vis 'systematics'
 - ii) To study general range of variations in the group of angiosperms.
 - iii) To trace history of development of systems of classification emphasizing angiospermic taxa.
 - iv) To study characters of biologically important families of angiosperms
 - v) To study range of floral variations in angiospermic families, their phylogeny and evolution.
 - vi) To study various rules, principles and recommendations of plant nomenclature
 - vii) To know modern trends in taxonomy
 - viii) To study major evolutionary trends in various parts of angiospermic plants.
-

Chapter I - Introduction:

(03L)

- i) Taxonomy and Systematics: Conceptual Development
- ii) Aims and Principles
- iii) Approaches and importance
- iv) Diversity of angiosperms with respect to:
 - a) Form, structure and function
 - b) Evolutionary status of Angiosperms

Chapter II - Classifications: History of Development:

(09 L)

- i) Review of Pre-Darwinian classifications
- ii) Review of Post-Darwinian classifications
- iii) Recent Systems

Chapter III - Discussion of the following families with respect to salient features and points of biological importance:

(10L)

Sarraceniaceae, Lentibulariaceae, Droseraceae, Nepenthaceae,
Cuscutaceae, Orobanchaceae, Balanophoraceae, Refflesiaceae,
Santalaceae, Loranthaceae, Podostemnaceae, Rhizophoraceae,
Cactaceae, Orchidaceae, Aristolochiaceae.

Chapter IV : Discussion of following families with reference to range of floral variations, taxonomy, phylogeny and evolutionary trends :

(12 L)

Ranunculaceae, Tiliaceae, Meliaceae, Cactaceae, Umbelliferae, Compositae, Asclepiadaceae, Scrophulariaceae, Plumbaginaceae Amaranthaceae, Liliaceae, Orchidaceae, Scitaminae, Commelinaceae, Graminae.

Chapter V: Sources of Taxonomic Information: Role of the following: (10 L)

- i) Micromorphology and Ultrastructure
- ii) Embryology and Palynology
- iii) Anatomy
- iv) Photochemistry
- v) Reproductive biology
- vi) Plant geography and Ecology
- vii) Genetics and Cytogenetics
- viii) Paleobotany

Chapter VI: General Evolutionary Trends in Angiosperms: (08L)

- i) Habitat and growth habit
- ii) Leaf structure: Simple and compound, phyllotaxy
- iii) Phyllode theory
- iv) Evolution of inflorescence
- v) Primitive stamen
- vi) Primitive carpel
- vii) Nature of inferior ovary: Foliar (Appendicular) and Receptacular (Axial) theories
- viii) Evolution of gynoecium
- ix) Evolution of floral nectaries
- x) Evolution of fruit

Chapter VII: Study of Botanical Nomenclature with respect to: (08 L)

- i) Scientific names and Common names
- ii) International Code of Botanical Nomenclature (ICBN)
- iii) Review of various codes
- iv) Principles of the code I-V
- v) Type method (Typification) and working of Type method
- vi) Author citation

- vii) Rejection of names
- viii) Retention of names
- ix) Conservation of names
- x) New Names
- xi) Names of cultivated and hybrid plants

Semester – I
BOT. 102
ENVIRONMENTAL BOTANY AND BIOSTATISTICS

Total: 60 Lectures

Aims and Objectives:

- i). To understand the environmental botany.
 - ii) To study the nature and its co-relation with human society.
 - iii) To study the impact of human activities on environment.
 - iv) To understand global issues concerned with environment.
 - v) To understand the sustainable development and care of environment.
 - vi) To understand the connection between material wealth & resources exploitation;
 - vii) To understand the relationship between economic growth and environmental degradation
-

Environmental Botany (40 Lectures)

Chapter I - Environmental Botany: **(05L)**

- i) Introduction, scope and Importance
- ii) Environmental Interrelationships; The interrelated Nature of Environmental Problems
- iii) Physical environment, Biotic environment; Interrelated scientific Principles: Matter, Energy and Environment; Interactions of Environment and Organisms

Chapter II – Environmental Ethics **(04L)**

- i) Environmental Attitudes
- ii) Individual Environmental Ethics, Societal Environmental Ethics Corporate Environmental Ethics, Global Environmental Ethics
- iii) Environmental Justice

Chapter III- Ecosystem Ecology: **(02L)**

- i) Productivity of different ecosystems – Primary productivity and secondary productivity.
- iv) Human Impact on Ecosystems and Resources

Chapter IV - Fundamentals of Remote Sensing and GIS: **(06L)**

- i) Definition, concept and history of remote sensing, Electro-magnetic radiation (EMR), Energy interaction with atmosphere, interaction with Earth's surface materials.

ii) GIS: Definition, history and introduction, components of GIS, Concept of data, information, knowledge Data: spatial and non-spatial data, raster and vector data, GIS file formats.

iii) Applications of RS and GIS in Forestry and Ecology: forest density, Forest type mapping, inventory of forests, delineation of degraded forests, damage assessment, Landscape characterization, Biomass assessment, Forest ecosystem management

Chapter V Forestry: **(05L)**

i) Agro forestry ii) Social

forestry iii) Forest

conservation iv) Wetland

Management

v) Water Management : a) The Water issue and hydrologic Cycle b) Kinds of Water use c)

Water use Planning Issues

Chapter VI - Solid Wastes: **(03 L)**

i) Introduction

ii) Types and Sources of Solid Wastes

iii) Solid Waste Management (Collection, Resource & Disposal Recovery and sustainable management)

Chapter VII - Environmental Management : **(05L)**

i) Concept, Scope and Procedure of EIA

ii) Environment Management Plan (EMP)

iii) Environmental Auditing

iv) Green Belt

v) Kyoto Protocol

Chapter VIII - Environmental Legislation: **(06L)**

i) Forest Conservation Act

ii) General account of legislation related to environment

iii) Wild life Protection Act – 1972

iv) Water Act – 1976

v) Environment Protection Act – 1985

vi) Biodiversity Act (2002)

Chapter IX - Global Environmental Issues and Conference: (04L)

- i) Global Warming, Green House Effect, Acid Rain, Ozone layer depletion
- ii) Earth Summit, The United Nations Conference on the Human & Environment, 1992, United Nations conference on climate change 2009

(II) Biostatistics (20 Lectures)

Chapter X- Sampling Methods: (02L)

Chapter XI - Measure of Central Tendencies: (02L)

- i) Mean
- ii) Mode
- iii) Median
- iv) Properties, merits and demerits of central tendency

Chapter XII - Measure of Dispersion: (03L)

- i) Range
- ii) Standard Deviation, Mean Deviation
- iii) Coefficient of Variation, Co-efficient of co-relation
- iv) Standard Error

Chapter XIII - Distribution: (02L)

Probability and Distribution (Normal)

Chapter XIV- Test of Significance: (02L)

- i) Concept of Significance
- ii) Students test
- iii) Chi square (X^2) test

Chapter XV - Analysis of Variance (ANOVA) (05L)

- i) Introduction and Application in Biology
- ii) ANOVA table and F ratio, least significant difference

Semester -I
BOT 103
CYTOGENETICS AND MOLECULAR BIOLOGY
Total 60 Lectures

Aims and Objectives:

- i) To study structural organization and variation in chromosome as well as karyotype analysis.
 - ii) To study extra-chromosomal inheritance in plant system.
 - iii) To study molecular biology in relation to genetic material, its inheritance, modification, replication and repair.
 - iv) To study transcription, translation post translation modification of protein.
 - v) To study gene regulation in prokaryotes and eukaryotes.
-

CYTOGENETICS

Chapter I: Cytogenetic:- (02)

Definition, history and application in biology

Chapter II: Cell and its components:- (05)

Definition of cell, types of cell, Prokaryotic cell structure, eukaryotic cell structure, various cellular organelles found in prokaryotic and eukaryotic (Plant) cell and their functions.

Chapter III: Cell Cycle, its Regulation and control: (04)

Mitosis, Meiosis, Check Points, Cyclins and Cyclin dependent Kinases. Apoptosis and programmed cell death.

Chapter IV: Karyotyping :- (07)

Chromosome Structure, Types of chromosomes on the basis of centromere, variation in chromosome structure-(Deletion, Duplication, Inversion and Translocation), Variation in chromosome Number (Euploidy, Eneuploidy, methods of inducing Auto and Allopolyploidy). Banding pattern Q, C, G, and R-bandings, Special types of chromosomes.

Chapter V: In-situ hybridisation :- GISH , FISH (01)

Chapter VI: Transposons:- Definition , history , types, and importance. (02)

Chapter VII: Cytoplasmic inheritance: (03)

Cytoplasmic inheritance involving Chloroplast (*Mirabilis jalapa*, *Zea mays*), Mitochondria (Male sterility in higher plant).

Chapter VIII: Linkage group, linkage map construction correlation with Restriction mapping (Restriction enzymes, construction of RE map). (04)

Chapter IX: Cancer: - Oncogenes proto-oncogenes, metastasis, agent causing cancer, RB protein and E2F. (02)

MOLECULARBIOLOGY

Chapter X: Introduction: - Definition , milestones of molecular biology, scope and importance. (01)

Chapter XI: Nucleic acids:- basic properties and moieties of nucleic acids, discovery and types. (01)

Chapter XII: DNA :- physical and chemical properties, various types of DNA. Molecular organisation of chromosome and chromatin, nucleosome solenoid , scaffold etc. (04)

Chapter XIII: DNA replication, repair and recombination (Unit of replication, enzymes involved, replication origin and replication fork, DNA damage and repair mechanisms, homologous and site-specific recombination). (04)

Chapter XIV: Genetic recombination: Molecular mechanism of recombination, role of RecA and RecBCD enzymes Chromosome mapping, linkage group, genetic markers, construction of linkage maps, correlation of genetic and physical maps. (04)

Chapter XV: Gene mutation:- Mutagens, Molecular basis of mutation, Mechanism of Spontaneous and induced mutation. (03)

Chapter XVI: RNA:- Physical and chemical properties of RNA, RNA synthesis and processing (transcription factors and machinery, formation of initiation complex, transcription activator and repressor, RNA polymerases, capping, elongation, and termination, RNA processing, RNA editing, splicing, and polyadenylation, structure and function of different types of RNA, RNA transport). (04)

Chapter XVII: Protein synthesis and processing (Ribosome, formation of initiation complex, initiation factors and their regulation, elongation and elongation factors, termination, genetic code, aminoacylation of tRNA, tRNA -identity, aminoacyl tRNA synthetase, and translational proof-reading, translational inhibitors, Post- translational modification of proteins). (05)

Chapter XVIII: Gene regulation : in Prokaryotes(operon concept, LAC operon TRP operon); in eukaryotes : Eukaryotic transcriptional regulation (promoter enhancer and silencer, Gene battery) and post transcriptional regulation. (04)

BOT 104 Practical –I
(Based on BOT. 101 Angiosperm Taxonomy)
(Total: 24 Practicals)

Practicals1-18: Study of following families with respect to morphological characters using botanical terms, floral formula, floral diagram and classification giving reasons as per Bentham and Hooker's system covering major groups of it (Any 20 families locally available as per syllabus)

Practicals19-20: Identification of genus and species with the help of flora of the plant materials from the families mentioned in syllabus.

Practicals21-22: Preparation of artificial, bracketed/indented dichotomous keys based on vegetative and reproductive characters.

Practicals23-24: Study of Morphological and biological peculiarities of the following:

- i) Insectivorous plants: *Drosera, Utricularia, Nepenthes*
- ii) Parasitic plants: *Striga, Cuscuta, Dendrophthoe, Viscum*
- iii) Aquatic plants: *Limnophila, Pneumatophore*
- iv) Inflorescences: Spadix, Cyathium, Catkin
- v) Flowers: Orchid and Cleistogamous flowers.
- vi) Phyllode: Australian *Acacia*
- vii) Velamen tissue of Epiphytic Orchid

Note: i) Botanical excursions and submission of scientific excursion reports from one locally and vegetationally different locality are compulsory.
ii) Duly certified journals are compulsory at the time of practical examination.

Following floras may be consulted for practical purpose:

1. **Cooke, T. (1958)** Flora of Presidency of Bombay Vol.I-II, Botanical Survey of India, Calcutta, India.
2. **Hooker, J.D.(1872-1897)** Flora of British India, Vol. I-VII, Reeves & Co., London.
3. **Kamble, S.Y. and S.G. Pradhan (1988)** Flora of Akola District, Maharashtra, Botanical Survey of India, Calcutta, India.
4. **Kshirsagar, S.R. and D.A.Patil (2008)** Flora of Jalgaon District, Maharashtra, Bishen Singh Mahendra Pal Singh, Dehra Dun, India.
5. **Kulkarni, B.G. (1988)** Flora of Sindhudurg, Botanical Survey of India, Calcutta, India.
6. **Lakshminarasimhan, P. & B.D. Sharma (1991)** Flora of Nashik District, Botanical Survey of India, Calcutta, India.
7. **Naik, V.N. (1999)** Flora of Marathwada, Vol. I-II, Amrut Prakashan, Station Road, Aurangabad, India.
8. **Patil, D.A. (2003)** Flora of Dhule and Nandurbar District (Maharashtra). Bishen Singh Mahendra Pal Singh, Dehra Dun, India.
9. **Shah, G.L. (1978)** Flora of Gujarat State, Vol. 1-2, Vallabh Vidyanagar, Gujarat, India.

**BOT 105 Practical –II (Based
on Bot 102 and Bot 103)
(Total: 24 Practicals)**

Practicals 1- 4: Practicals on study of vegetation by using following methods for Estimation of FICC, IVI, frequency, Density, Abundance and Histogram.

- a) Quadrat Method: - i) List count Quadrat ii) Chart Quadrat
- b) Transect Method: -i) Line Transect ii) Belt Transect
- c) Physiognomic Method : - i) Biological Spectrum.

Practical 5: Estimation of Biomass

Practical 6: Instruments used for collection of meteorological data (any six)

Practical7: Estimation of Phosphatic fertilizers from agricultural soil using colorimeter / Spectrophotometer.

Practical8: Element of visual interpretation of aerial photograph or satellite image.

Practical9: Details and use of mirror stereoscope and pochet stereoscope for interpretation.

Practical10-12: Examples based on Biological Data

- a) Measure of Central Tendencies
- b) Measure of Dispersion
- c) Test of significance X test and t - test
- d) Normal Distribution

Practical 13: Preparation of Cytological fixative (Carnoy's fluid I, II, Navashin' s fluid etc.)

Practical 14: Preparation of stains, Aceto-carmine/ aceto orcein, Haematoxylene, and Feulgen

Practical 15-16: Squash and smear preparations to study Mitosis in onion root tips and Meiosis in *Zea mays* or *Allium cepa* or *Rhoeo discolour* flower buds (Aceto carmine or aceto orcein).

Practical 17: Squash or smear preparations to study Mitosis or Meiosis in suitable material using Haematoxylene, or Feulgen stain (any one).

Practical 18: Determination of Mitotic index and Metaphase frequency in *Allium cepa* or other plant material.

Practical 19: Demonstration of salivary gland chromosome preparations (*Chironomous* larvae/*Drosophila*).

Practical 20: Estimation of RNA by Orcinol Method.

Practical 21-22: Isolation and estimation of DNA from suitable plant material.

Practical 23: Study of chromosomal aberrations in plant (*Rhoeo discolor*).

Practical 24: Isolation and Janus green staining of mitochondria.

Semester- II
BOT 201
Diversity of Lower Cryptogams
Total 60 Lectures
Algae (30 Lecturers)

Aims and Objectives:

- i) To study salient features of Algae and Fungi.
 - ii) To study diversity of lower Cryptogrammic plants in nature.
 - iii) To study the life cycle patterns in lower cryptogams.
 - iv) To study algae and fungi for human welfare.
-

Chapter I: Introduction of Algae (10)

- i)– Introduction to the algae
- ii) – Review of algalogical studies : In India & Maharashtra.
- iii) – General characteristics of algae and similarities and differences with Fungi and Bryophytes.
- iv) – Diversified habitats
- v)– Reproductive diversity and perenation.
- vi) – General account of vegetative thallus structure
- vii)– Life cycle patterns : Monophasic, Diphasic & Triphasic
- viii)– Economic aspects : Useful & Harmful.

Chapter II: Classification of algae upto order with suitable examples. (03)

- i)– Comparative survey of important system of classification :
 - Fritsch's system of classification (1945)
 - Parkar's System of classification (1962)
 - V. J Chapman & D. J Chapman system (1973)
- ii) Comparative account of range of cell organization in Chlorophyceae, Bacillariophyceae, Phaeophyceae, Rhodophyceae & Myxophyceae in brief.

Chapter III: Cytology of algal cell (03)

- i)– Details of a Prokaryotic & Eukaryotic cell
- ii) Pigmentation : Kinds of pigments and their properties.

Chapter IV: Study of important class of Algae: (14)

a) **Myxophyceae**

- i) – General characters & Primitive characteristics
- ii) – Thallus organization & cell structure
- iii) – Ultra structure & functions of Heterocyst
- iv) – Nitrogen fixation & metabolism
- v) – Reproduction
- vi) – Ecology of Blue green algae
- vii) – Phylogeny & interrelationship

b) Chlorophyceae

- i)- General characters
- ii)- Range of thallus structure & cell structure
- iii)- Method of reproduction & life cycle pattern
- iv)- Phylogeny & interrelationship

c) Phaeophyceae

- i)- General characters
- ii)- Ranges of thallus structure & Anatomy
- iii)- Method of reproduction & life cycle patterns
- iv)- Phylogeny & interrelationship

d) Rhodophyceae

- i)- General characters
- ii)- Rangs of thallus cell structure & Calcification
- iii)- Method of reproduction & life cycle pattern
- iv)- Phylogeny & interrelationship

e) Xanthophyceae –

- i)- General characters
- ii)- Phylogeny & interrelationship

f) Bacillariophyceae –

- i)-Cell structure & silicification
- ii)-Clascification & reproduction
- iii)- Phylogeny & interrelationship

g) Euglenophyceae –

- i) - General characters
- ii) - Cell structure
- iii) - Phylogeny & interrelationship

Fungi (30 Lectures)

Chapter V -Fungi – Introduction:

(6L)

- i) Distinguishing characters
- ii) Thallus- unicellular and multicellular filamentous
- iii) Nutrition
- iv) Hyphal modifications in Fungi
- v) Evolutionary trends in fungi
- vi) Classification of fungi up to classes as per- Ainsworth et al., system of classification (1973).
- vii) Economic importance- Fungi in biotechnology, fungi as food

ChapterVI - Myxomycotina:

(03L)

- i) Distinguishing characters
- ii) Structure of thallus and reproductive bodies

iii) Life cycle pattern with reference to *Pysarum*.

Chapter VII -Mastigomycotina: (03L)

- i) Distinguishing characters
- ii) Thallus structure and reproduction (Asexual and sexual)
- iii) Life cycle pattern with reference to *Plasmopara*.

Chapter VIII -Zygomycotina: (03L)

- i) Distinguishing characters
- ii) Thallus structure, Heterothallism
- iii) Sexual reproduction, Evolution of Asexual reproduction
- iv) Life cycle pattern with reference to *Mucor*

Chapter IX -Ascomycotina: (05L)

- i) Distinguishing characters
- ii) Thallus structure, structure of asci, Concept of Hamathecium and centrum, Types of ascocarps
- iii) Life cycle pattern with reference to *Eurotium*

Chapter X-Basidiomycotina: (05L)

- i) Distinguishing characters
- ii) Thallus structure, Types and Structure of Basidia and basidiocarps
- iii) Life cycle pattern with reference to Teliomycetes

Chapter XI - Deuteromycotina: (03L)

- i) Distinguishing characters
- ii) Thallus structure, fructifications
- iii) Types of conidia

Chapter XII Fungi of special habitats: (2L)

- i) Fungi in wood decay
- ii) Freshwater fungi
- iii) Mycorrhiza
- iv) Dermatophytes

Semester- II
BOT.202
Diversity of Higher Cryptogams
Total:- 60 Lectures

Aims and Objectives:

- i) To make students aware of the status of higher cryptogams as a group in plant kingdom.
 - ii) To study habit and habitat of the higher cryptogams in the field.
 - iii) To study distinguishing features, interrelationships, phylogeny and evolutionary tendencies of selected orders with their affinities.
 - iv) To study economic importance of higher cryptogamic plants.

BRYOPHYTA (30 Lectures)

- i) Classification of Bryophytes proposed by G.M. Smith up to orders with reasons
 - ii) Distribution of Bryophytes in India and their Ecology
 - iii) Contribution of Indian Bryologists
 - a) Prof. Shiv Ram Kashyap
 - b) Prof. S.K. Pande

Chapter II Distinguishing features, interrelationships, phylogeny and evolutionary tendencies of the following orders: (20 L)

- i) Hepaticae:
 - Sphaerocarpales
 - Marchantiales
 - Jungermanniales
 - Calobryales
 - ii) Anthocerotae : Anthocerotales
 - iii) Musci :
 - Sphagnales
 - Andreaeales
 - Polytrichales

Chapter III General Topics: (04 L)

- i) Evolution of gametophytes and sporophytes of Bryophyta
 - ii) Economic importance of Bryophyta

PTERIDOPHYTA (30 Lectures)

Introduction:

(06 L)

- i) Classification of pteridophytes proposed by Reimers up to orders with reasons
- ii) Distribution of pteridophytes in India
- iii) Contribution of Indian Pteridologists:
 - a) S.S. Bir
 - b) B.K. Nayar

Chapter IV Morphology, anatomy, and comparative discussion of sporophytes, gametophytes, interrelationships, evolutionary tendencies and phylogeny of following living orders:

(20 L)

- i) Psilotopsida
 - a) Psilotales
- ii) Lycopsida
 - a) Lycopodiales
 - b) Selaginellales
 - c) Isoetales
- iii) Sphenopsida
 - a) Equisetales
- iv) Pteropsida
 - a) Marattiales
 - b) Ophioglossales
 - c) Osmundales
 - d) Filicales (Any two families)
 - e) Marsileales
 - f) Salviniales

Chapter V General Topics

(04 L)

- i) Soral evolution
- ii) Economic importance of Pteridophytes

Semester- II
BOT.203
PLANT PHYSIOLOGY AND BIOCHEMISTRY
(Total 60 Lectures)

Aims and Objectives:

- i) To understand plant structures in the context of physiological functions of plants.
 - ii) To study the growth and development of plants and its regulations
 - iii) To understand the physiological details of photosynthesis and respiration.
 - iv) To understand lipid metabolism in plants .
 - v) To understand the stress of plants and its adaptations.
 - vi) To study the metabolites synthesized by plants.
 - vii) To study the redox systems of plants
-

PLANT PHYSIOLOGY (40 Lectures)

ChapterI - Introduction, Scope and Importance (02L)

ChapterII -Phytohormones (06L)

- i) Bioassay of Auxins, Gibberrellins, Cytokinins.
- ii) Transport and storage of hormones.
- iii) Physiological effect of Auxins, Gibberrellins and Cytokinins.

ChapterIII -Photosynthesis: (10L)

- i) Introduction and Definition
- ii) Brief account of photosynthetic pigments
- iii) Light reaction
- iv) Dark reaction
- v) CAM Pathway and its Significance
- vi) Formation of Starch, sucrose and fructose
- vii) Factors affecting the rate of photosynthesis-Light, temperature, water, O₂ and CO₂

ChapterIV -Respiration: (10L)

- i) Introduction and Definition
- ii) Respiratory Quotient (RQ)
- iii) Formation of Hexose sugars from reserve carbohydrates
- iv) Mechanism: a) Glycolysis b) Kreb's cycle c) Electron transport system (ETS)
- v) Fermentation:
 - a) Alcoholic fermentation
 - b) Acetic acid fermentation
 - c) Lactic acid fermentation

- vi) Factors affecting the rate of respiration

Chapter V – Fat Metabolism (08L)

- i) Introduction
- ii) Synthesis of fatty acids and glycerol
- iii) Condensation of fatty acids and glycerol
- iv) Glyoxylate cycle (C_2 cycle)

Chapter VI - Stress Physiology: (04L)

- i) Definition
- ii) Types of Stress
 - a) Water stress-Drought, Cold and Salt
 - b) Temperature stress-High and Low

BIOCHEMISTRY (20 Lectures)

Chapter VII - Introduction: (03L)

- i) Definition, Scope and Importance
- ii) Hydrogen ion Concentration
- iii) PH and Buffers

Chapter VIII - Primary and Secondary Plant Metabolites (06L)

- i) Brief account of primary plant metabolites
- ii) Brief account of secondary plant metabolites
- iii) Biosynthesis of Trepene, Phenols and Nitrogenous compounds and their role.

Chapter IX - Biological Oxidation and Reduction: (06L)

- i) Introduction
- ii) Oxidation & reduction reactions
- iii) Redox reaction in biological system
- iv) Oxidation-reduction potential and measurement
- iv) Biologically important Redox Systems.

Chapter X -Biosignaling: (05L)

- i) General features of Signal and Transduction
- ii) G-protein mediator, couple receptor
- iii) Receptor Gateway

BOT 204 Practical-I
(Based on BOT 201 (Total Practicals – 24)

Algae : (12 Practicals)

Morphological observations, description and classification according to Fritsch with reason of taxa belonging to at least two examples from each order.

Practicals1 - 2: Cyanophyta: Any 10 forms

Practicals 3-6 :Chlorophyta: Any 25 forms

Practical 7 :Charophyceae- *Chara, Nitella*

Practicals 8-9 : Xanthophyceae – *Vaucheria, Botrydium*

Bacillariophyceae- *Navicula, Pinnularia, Fragillaria, Synedra, Nitzchia, Cymbella, Cyclotella, Pleurosigma, Gyrosigma, Coconeis*, (any 4 forms)

Practical 10 : Phaeophyta – Any 5 forms

Practical11 : Rhodophyta- Any 4 forms

Practical 12: Preparation of temporary and permanent algal slides

Fungi: (12 Practicals)

Practical 13: Preparation of cotton blue, Lactophenol and culture medium - PDA

Representative genera belonging to following subdivisions of fungi with respect to vegetative, reproductive structures and classification with reasons according to Ainsworth et al. (1973).

Practical 14: Myxomycotina –(Any three genera)

Practical 15: Mastigomycotina – (Any Four genera)

Practical 16: Zygomycotina – (Any three genera)

Practicals 17-19: Ascomycotina - (Any Nine genera)

Practicals 20-22: Basidiomycotina-(Any Nine genera)

Practical 23-24 : Deuteromycotina - (Any Six genera)

Note: i) Excursion tour is compulsory to observe algae and fungi in nature. Tour report along with photographs must be submitted at the time of practical examination. ii) Duly certified journals are compulsory at the time of practical examination.

BOT 2.5 Practical II (Based on BOT 202 & BOT 203) (Total Practicals – 24)

Bryophyta (6 Practicals)

Morphological, Anatomical and Reproductive studies of the following:

Practicals 1 -2: Marchantiales: *Plagiochasma, Targionia, Asterella Conocephallum* & *Dumontiera*.

Practicals 3-4: Jungermanniales: *Pellia, Fossombronia, Pallavicinia, Porella and Frullania* .

Practical 5: Anthocerotales – *Anthoceros, Notothylus*

Practical 6: Musci: *Polytrichum, Pogonatum, Sphagnum*

Pteridophyta (6 Practicals)

Morphological, Anatomical and Reproductive studies of the following

Practical 7: *Lycopodium, Isoetes*

Practical 8: *Ophioglossum, Osmunda*

Practical 9: *Gleichenia, Pteris, Adiantum.*

Practical 10: *Asplenium, Lygodium.*

Practical 11: *Pleopeltis, Cheilanthes*

Practical 12: *Marsilea, Salvinia, Azolla*

Note:

- i) **Excursion tour is compulsory to observe Bryophytes and Pteridophytes in nature. Tour report along with photographs must be submitted at the time of practical examination.**
- ii) **Duly certified journals are compulsory at the time of practical examination.**

Plant Physiology and Biochemistry (12 practicals)

Practical 13: Determine diaurnal fluctuations in titrable acid number (TAN) values of CAM succulents (e.g. Aloe, Bryophyllum, Kalanchoe - any one)

Practical 14: Determine the absorption spectrum of chlorophyll p igments and estimate the amount of Chl-a, Chl-b and total Chlorophylls by spectrophotometer method.

Practicals 15 & 16: Extraction and separation of free amino acid of germinating seed by circular paper chromatography.

Practical 17: Extraction and separation of free sugars from ripe fruits by ascending paper Chromatography.

Practical 18: To extract and estimate the amount of Ascorbic acid present in green paper (Raw)/ Lemon (Fresh).

Practicals 19-20: Extraction and Detection of secondary plant metabolites from suitable plant material i) Alkaloids ii) Phenols iii) Terpenoids iv) Proteins.

Practical 21: Estimation of amount of CO₂ evolved during respiration (Germinating Pea seeds).

Practical 22: Estimation of ether soluble fat oil of *Ricinus/ Arachis* seeds by Soxhlet apparatus.

Practical 23: To study the activity of enzyme lipase in germinating seed s (Source-*Arachis /Ricinus*) any one.

Practical 24: Estimation of alcohol in fermented grape juice.
